THIS REPORT IS SUPPLEMENTARY TO “DIALOGUES WITH THE COSMOS”. & REPORT I OF DIALOGUES WITH THE COSMOS I (PRESENTLY UNDERGOING A BIG UPDATED DRAFT). FOR YOUR COMPREHENSION READ THESE BEFORE THIS REPORT LONG VERSION (IT IS A BIT OF A TEASER:-))

*[CONSIDERABLE EFFORT HAS GONE INTO THIS REPORT. IN THIS FORM IT MAY BE TOO LONG FOR THOSE WITH LITTLE TIME IN THEIR LIFE. THE SHORTER WAY THROUGH THIS: “OVERVIEW” TO “UFO SIGHTINGS CONTINUE”; THEN JUMP TO “DIALOGUES WITH THE COSMOS II — UFO SIGHTINGS LOG.” **MAIN SIGHTINGS LOG: “24TH AUGUST, OBERE WIESE, SILBERTAL — THE UFOS BEGIN”**. & STOPPING BEFORE “GOING INTO DEEPER TERRITORIES.”]*

FOR THOSE ONLY INTERESTED IN DEEPER THEORIES OF THOUGHT ON THIS, JUMP TO “GOING INTO FURTHER ‘FAR-OUT’ DOMAINS” (NOT RECOMMENDED WITHOUT SOME EXPERIENCE IN THIS AUTHORS WRITTEN WORKS)

OVERVIEW

UFO sightings and interactions continue in this European Civilian Cosmic Contact effort. This time in the high Austrian Alps, around the “silver valley” and famous Montafon ski region.

Several types of clear UFOs appeared in Dialogues with the Cosmos II, which also came with some surprises.

Unidentified Flying Object sightings including those termed “jumpers” and “time jumpers”, as these UFO objects “pulse-flash” and then jump ahead, or to another direction, and then brighten up again, and “pulse flash,” appeared high over the Silbertal valley.

Pulse-flashes which appear to have an affect upon consciousness!

And other important experiences to note, and apply in the continuation of Civilian Cosmic Contact Interfacing. An interface effort that now becomes a pertinent civilian effort after such historically significant events as “The Citizens Hearing on Disclosure,” Washington Press room (as reported in our April Grailzine alerting the European public ahead of this event, which is changing history, amidst other related events.

In Dialogues with the Cosmos I, set in the Swiss Alps, a large number of UFO sightings and close approaches engaged this 1st civilian group, manifested, including extremely low approaches.

More complete briefings were transmitted in the 2nd Austrian event, making Dialogues I & II, of summer 2013, a complete set, and successful effort.

Some of the participants, in later fine tuning, feel continued connection to what they saw, and the Intelligence related to them, as well as the resulting ever incoming growing number of UFO sighting reports.

SETTING

An international group from diverse backgrounds and diverse experiences, gathered in the Austrian region of Silbertal (the “silver valley”, known for its silver mines, not too far away from Tirol) — some with UFO experiences, others with maybe’s, others with no UFO sightings at all, and others with other kind of experiences and backgrounds.

During one of the night “Field Work” sessions, there were “jumping” Unidentified Flying Objects, “pulse-flashers”, “power-ups”, and all these near to the full moon high in the sky, and other sightings, and experiences.

One of the UFOs went right next to the full moon as its silver sphere hang over the silver valley. Yet this “pulse-flasher” maintained a magnitude of brightness that enabled it to be seen just besides the full moon, at the end of its travelling trajectory, after it just appeared out of empty space at the beginning of its trajectory path.

This UFO's pulse flashes being brighter than the moonlight, with a coherent, laser-like, light, very clearly distinguished — a clear light that also goes deeper into the personal psyche than normal light, when one is in its beam.

WEEKS BEFORE DIALOGUES II — PARTICIPANTS STARTED HAVING SIGHTINGS

Weeks before the Dialogues began, there were UFO sightings in the Silbertal valley. Around one week before the event, one of the carpenters of the seminar house in which Dialogues II took place, Helmut Ganal, witnessed an Unknown Flying Object go off east along the valley in an anomalous manner. It made large zig zag movements in its course and pathway trajectory path out of the valley, as it travelled along silently, without any discernible audible sound, and could only be compared to an object of the same anomalous character that was seen two years before by Mr Ganal.

Members of this Dialogues with the Cosmos had UFO sightings 3 weeks before the event, and some also after. In fact sightings continue to come in successfully, from these “unity units” of this civilian operation.

However, one participant, Margot Heim, was at the event partly due to having a very clear UFO sighting in May this year. Now following the Dialogues protocols and sightings, her sightings are continuing, as she also brought her brother to see the Unknown “Flying” Others.

Chemist/chemist, Hans Peter Diehl (Bochum University), who was translating Ananda Bosman's briefing from English into German during this event, had a personal UFO “pulse flasher” 9 days before the event, that he felt went deeply into his being.

“HP” Diehl had seen UFOs before in Norway, in August 2002, when in a dawn lit sky a golden UFO appeared moving towards him and pulse flashed a scientist standing between Ananda and Hans Peter. A UFO whose pulse flash was aimed at the scientist who had his own experience as a result, as his body shuddered from the aimed pulse flash.

This time Hans Peter Diehl (HP), experienced his own aimed pulse flash, as he testified to during this Dialogue with the Cosmos II.

Mr. Sur., who had been in the Swiss Alps Dialogues I, had a wealth of UFO sightings following this 1st operation, in-between Dialogues I & II, and that for him came, almost, “too close”, he testified to the Dialogue II group in Austria.

Amidst the overwhelming amount of sightings that appeared in Mr Sur.'s life as a consequence of the Swiss Cosmic Dialogue, was one of the more personal, for him, UFO sightings — a very close pulse flasher on his birthday, on August 15th, as soon as he came outside the house to Skywatch and Dialogue. The UFO was VERY low down and gave him 5 powerfully bright pulse flashes — this was in the region where he was living.

Mr. Sur. even took the opportunity to show his mother the Unknown Flying Objects of the Other, when she suggested watching a meteor shower on August 13th. He then told her that there were other things to see in the sky, and proceeded to show her the various categories of UFOs, like pulse flashers etc.

The mother initially open, started to point out the UFOs herself as the night commenced, and they continued their Dialogue as they had been doing *en masse* to Mr. Sur. The next day, however, the “penny dropped” for Mr. Sur.'s mother! She asked, “do you really think those are UFOs?” She said. When Mr. Sur. responded in the affirmative, she went white in the face with as the implications dawned on her.

This author had demonstrations of new types of interfacing in the sightings, or rather was shown more distinguished forms of the kinds of sighting types that would unfold as dialogue syntax interfaces, including on August 1st, the Swiss Confederation founding day (in resonance to the 1st Dialogue taking place in Switzerland).

On the same date Erika Marzani, a civilian unity unit of Dialogues I, was having similar sightings to Ananda, with similar demonstrations (these will be reported in Dialogues with the Cosmos Report III).

And in Nuremberg, Boris Schwartz (who later attended Dialogues II), on August 1st and August 2nd, had some interesting sightings as well. Going from 15 in number to 50, in just some hours, he related by email in an excited state as the sightings were commencing (transmitting the important 155 astro code, by the combination of 15-50. A precise astronomical code that Ananda detailed in the briefing 3 weeks later, a coincidence that was in a large consequent margin of high improbability, like 10 million to 1).

Boris described spheres in the sky passing over Nuremberg, and during the night spheres that were laser flashing beams to each other horizontally.

He did manage to capture some photographs. But some of these have been identified as known objects. Also a city, rather than a high altitude, remote site, also contains many “noise” making factors of human origin. Non the less *some* of the sightings Boris Schwartz testified to the Dialogues II group, appear to be of an anomalous nature, AND they were on the SAME day that Ananda, Erika Marzani, and Mr. Sur., were having sightings.

As on the same day Ananda had some of his major demonstrations (as described in a report in writing “Dialogues with the Cosmos III,” which will also describe Boris, Erika’s, and Ananda’s sightings, including those of August 1st).

Both Patrick Zudrell and co-organiser Helmut Zudrell had sightings shortly before the event, or related to the event, in the weeks before. Helmut had several UFO sightings in fact. One on the 17th of August, which was a very bright “power-up” and “pulse flasher” combo, low in the Silbertal valley, and shortly before the event, detailed in Report 3.

Also together two weeks before the event at around 3AM, scouting the second site of the Dialogue II “Field Work”, where our UFO sightings would concentrate — they both observed a “Pulse Flasher” going in the direction of south-east, with the typical irregular pulses of laser-like directed light, unlike anything else.

As this author was given this data before the event, from this team unit, this was also utilised as being a further clue, or “Cosmic Intel”, that this would be the site for sightings. Which it truly became.

UFO SIGHTINGS CONTINUE FOR UNITY UNITS AFTER DIALOGUES II

UFO sightings continue incoming from some of the unity units of this Dialogues II group, and in Silbertal just after the event.

One pulse flasher UFO sighting occurred for Dr. Carlo Oetheimer, professor in geomorphology, just several days after the event, when staying at the Zudrell Kristberg mountain hut elevated at 1,440 metres altitude. When the others came, including Ananda Bosman, it no longer was there, however. So this was a solo visit vista.

Dr. Oetheimer, witnessed the personal significance of the “pulse flasher” UFO in the Summer of 2012, when with Ananda in France — his 1st UFO sighting in knowing the author since 2006, which had a deeply personal effect.

In Silbertal, one week to the day of the Dialogues II sightings, Simone Waser (lawyer and this authors partner), Ananda Bosman, Malis and Helmut Zudrell, had a display of numerous UFOs at the Zudrell’s Kristberg mountain hut, some 1,440 metres overlooking Silbertal (details in Report 3); which included several kinds, including those with highly curved trajectories.

Ananda Bosman, upon return to Norway with Simone Waser, had further sightings on the 5th of September, which included a pulse-flasher on an arced trajectory, and a “pulsing heart-like” UFO making a “J” trajectory (see Dialogues with the Cosmos Report 3), on the same day that they linked the Norwegian Alps, the Jotunehiemen (“doorway to the planetary worlds of Asgard” in the Norse *Eddas*) — to Silbertal and the Simplon Pass in the Swiss Alps of Dialogues II & I.

Then, on that same date, and at precisely the SAME time, Margot Heim, had a clear UFO pulse flasher, which she could present and introduce to her brother. Countries apart, this was the same

time Ananda was seeing not a pulse flasher but the pulsing-heart UFO on the “J” trajectory curve path.

VALUE OF THE VACUUM

Not to be overlooked, this 2nd Dialogue with the Cosmos of 2013, was also the 1st, where on the 1st night, there was virtually NO phenomenon AT ALL!

As a result, and by the apparent choice of the “Other”, this can be used as a measure of contrast to the other Dialogue’s night UFO sightings continuum.

Dialogues I, also occurred during the full moon, which did not, however, reach its full Zenith height in the sky, in the July event, like it did in this August full moon event.

This vacuity of the UFO on this one occasion will not be swept under the rug, so to speak, and will be examined.

Not only is it of value, it is important to further groups, because, there are simply times, when the Other side of the dialoguers choose not to appear.

UFOS MEDIATING DIALOGUES

In between Dialogues I and Dialogues II members of the 1st Dialogues with the Cosmos, including Ananda Bosman, had some superb sightings. Including objects that we term “jumpers, and even “time jumpers”, appearing to jump when one focusses on them, “mind melding” along with the focussed protocols.

Appearing, at times, as if “time travelling”, like in the 1st Dialogue. Sometimes jumping forwards, way ahead of its trajectory, or side-ways, in zig-zag form, or on a completely new pathway of passage.

As well as the UFOs using other colours, than the typical white, white-gold, gold, or orange, that are usual.

Precisely these same colour changes occurred in the sightings of Erika Marzani, a unity unit team member from Dialogues I, in Milano, Italy. Erika’s sightings occurred around the same date as this authors demonstrations of identical phenomenon, occurring in Norway.

These will also be reported as adjacent to both Dialogues in Report 3, in documentary fashion (some of these sightings were already sent out to some Dialogue “Unity Units” in early August, in a more rudimentary form).

CIVILIAN DATA BANK NOTE: For the benefit of the civilian public record, a shortened bare-bones version of these reports (Dialogues I & II), with the relevant facts around the sightings, and numeration to each of the specific sighting events (with time line), will be given to each participant/witness, to sign, and select which numerated sightings they participated in — in gathering a European Civilian Body of Documentary Evidence.

Encouraging quality of detail and objective data in these efforts.

Further reports from Dialoguers, or “Unity Units”, continue to come in, and will be filled in the format of documentary evidence.

This is vital for the quality assessment of this European Civilian Effort, along with other similar efforts around the world, following quality documentary protocols.

GOING DEEPER — A DAM & STAR GATES & STELLAR CARTOGRAPHY AMIDST THE VOID

In the balance of things, interestingly on the 1st night of Dialogues II, there were absolutely NO significant sightings. The door appeared to be almost completely closed!

Some people, perhaps less acquainted with the sky, or trying to test the author, tried quite hard to see UFOs from stars, due to atmospheric moisture. Being momentarily convinced stars were leaving trail-like patterns — but they were known constellation stars, easy to get acquainted to. Atmospheric phenomenon is important to get familiar with, as well as learning the basic astronomical alphabet of the basic constellations, which will be used as one’s objective backset, as

one's Cosmic Dialogue skills increase, and quality sightings are distilled from the 95% noise of the backset of the known world and universe.

Even with hours under the stars, apart from a few meteorites and shooting stars and aeroplanes on commercial flight paths, and the most complete gathering of the entire group intently stargazing, in their most enthusiastic and open-minded state, this night was virtually a zero point :-)

The author along with others, scanning this high altitude sky with strong binoculars with night vision, that could see the deeper space stars, also did not turn up a single anomalous moving object, nor even a satellite!

The sightings came to only some of the group who chose to travel up to another mountain, the following night. Where several significant UFO demonstrations did, indeed, Dialogue with those who were not put off by the silence of the first night, or for other reasons.

This is in stark contrast to Dialogues with the Cosmos I, which began with continuous sightings of UFO-like observations including EXTREMELY close approaches, and occurring over TWO consecutive nights. Leaving the impression on some of the participants that this is the "normal" "standard", once the Cosmic Dialogues are engaged. This is not always the case, however.

Such an open-ended beginning in the 1st Dialogue, was a heavenward initiated impulse to a true beginning for such a European civilian operation for mankind engaging midway the dialogue with the cosmic Other engaging our planet, at this time.

However, in this Dialogue II, satellite tracking software/astronomical softwares were used onsite, in a real time sky and which moved according to the accurate cardinal placements of celestial objects like the moon, constellations, or planets like Jupiter.

Where each of the UFOs seen had absolutely NO visual magnitude satellite, or satellite, in the software data base at that time and longitude and latitude. This is an important progression for the Dialogues with the Cosmos. As will be seen in this report log.

Dialogues I, has to back track the time line according to the film recordings, and the reading of the time during the sightings, and then cross compare with the satellite data base. This is a lengthy process, as there were so many sightings.

The work done so far on the most significant Dialogue I UFO sightings, which were immediately time-lined, has been rather remarkably consistently, showing no accountable satellites for some of the most overt and com-memorable UFOs sightings amidst a vast number of sightings. Such as "Athena's" ship on the 1st and 2nd night of Dialogues I, and "H'Aton's" "time-jumper" ship, which have no satellites remotely near to their space and time and direction of appearances.

Also non visual magnitude satellites, that are commonly thought not to be visible with the naked eye, were not even remotely near the area of space; the cardinal trajectory through the given constellation; and at that accurately recorded time phase of its passage, nor to either side of its timeline (minutes before, or minutes after).

Of course, the very close approaches that also occurred in Dialogues I, are in a league of their own.

However, a smaller number of the group witnessed these.

There are also cross-comparison cases from the group, which fall into the category of 90-95% misidentified objects — which come under unusual circumstances, with such synchronicity, as if the Other is guiding the lessons in discernment, thereby. This is explored in report 3, as the phenomenon of "controlled increased meaningful synchronicity" is a common "side-effect" to the UFO phenomenon, and should be data based. As the record may reveal this to be one parameter central in the semantical grammar of the Other's Interfacing Dialoguing Operating System (OS).

Whilst this author has had over 28 years of experience in summoning UFOs, years before the term Close Encounters of the 5th Kind was coined, that have included landings, entity sightings, massive motherships seen in the company of a variety of credible witnesses — he is amidst the middle of

unfoldment of consciously engaged cosmic contact starting in the 1950s, and now fountaining to thousands of pioneering human beings amidst an Awakening Mankind.

As we appear to be in a time where all awakening human beings can have true cosmic dialogues in the *via media* form of the UFO Intelligence (explored in greater detail in report 3).

DIALOGUES WITH THE COSMOS II UFO SIGHTINGS LOG

Following an evening of multimedia briefings on the basic protocols, the DC-II group headed for the mountains not of Silbertal, but of the upper Montafon, the famous Ski region of the Austrian Alps, just before midnight, in a convoy of cars.

This Thursday going into Friday morning session of the 22-23rd August convoy, had to travel the long winding alpine roads from the valley to the heights, at the Silvretta Dam.

The group assembled at 2,200 metres high, at the top end of the long winding Alpine roads of the Silvretta pass, by the bridge of the Silvretta Dam, which makes the electricity for the entire valley. With an alpine temperature of 8 degrees, an alpine wind, position not too far from the Oxen glacier, and most of the group properly clothed and suit fitted for Skywatching — and the full moon at a high position in the sky, with a slight overcast layer blocking the deeper space stars from visibility despite the high altitude. The group was enthusiastic, open-minded, and ready.

1 (!?). At the beginning, as the group was at the end of assembling in comfortable position, on a piece of land right next to the Silvretta Dam bridge, Judy Hall, a long time friend of the author as well as to his mother, since 1990, and who had never seen UFOs before, noticed several pulse flashes through the clouds in the far west valley sky.

Ananda pointed these out when he saw them to the rest of the group with laser pointer beam.

The very high trajectory of each sequential pulse flash was progressively moving towards the group (non regular pulse-flashes, quite distinct to those of classical airliners and military planes, as those well familiar with the phenomenon well know, and as is exemplified in literally thousands of night vision movies from groups the world over).

This one, rather unspectacular. But after about 7-8 pulse flashes, no more came, this regardless of the intense skyward searching by the entire group, and the trajectory approaching pathway of each pulse flash.

After Judy had shown Ananda, and then by the time Ananda could laser point for others to see, perhaps some 3-4 more flashes were seen by members of the group.

This MAY be the only genuine unknown of day 1. And in context to other data and sightings, is assigned the number 1 (!?)., as the first possible sighting, along with the remaining 7 other clear UFO sightings.

Knowing the phenomenon well, and Judy Hall came to see a very close pulse flasher and “jumper” at the end of the following night, with Ananda, around the same time that numerous members of the group also saw a “pulse flasher” and a “jumper” that changed direction, with the full moon at its highest — this high up pulse flasher, was probably of the kind of phenomena that we are engaging.

This 1st object 1st seen by Judy, then Ananda, and some members of the group (those who agreed to have seen it, are on the audio log), does follow the characteristics of a classic UFO “pulse flasher” (as Ananda Bosman calls this form of UFO) — and in Skywatching sessions that the author has been initiating since 1985, they CAN begin very high up, and come lower as the observer interacts its “observational field” with that of the UFO, allowing, by cosmic decree, the UFO Intelligences to come closer and lower in their interactions, via the observational field interfacing, and other related factors.

However, when one has not seen this “pulse-flash” UFO type before, it will seem rather undramatic at the height it appeared, which also appeared amidst a low density cloud layer, and can be easily discounted by most.

Presently, the author has not been given the audio recordings of the timeline for this pulse flasher, so no complete analysis could be made.

It obviously can be discounted to be an airplane partially obscured at intervals by the clouds, so as to give an appearance somewhat reminiscent of a pulse-flasher, whilst at some distance.

However, since it completely disappeared and its pathway was directly towards the group where the sky was clearer, and above the group also clearer, and then onwards into the eastern valley, which had clearer skies, and nothing more came, by an intensely looking group, the airplane theory gets weak, at this point.

At least it remains rather improbable to be accounted for by an airplane, being at this 2,200 metres altitude site of the group. It simply vanished. Those who have seen the "pulse-flashers", who did see this one, can recognise a similarity, despite its height).

One astronomical software on the iPhone that shows the major sky satellites was also used on site, belonging to Petra Dagenheart, and which did not show any visual magnitude satellites in that direction at that time (the precision of this must be ascertained from the audio recordings, however).

It should also be noted that some members of the group, unfamiliar with the UFO-like phenomenon, like "power-ups" (jargon of ECETI), or "pulse flashers" (Ananda Bosman), or "Jumpers" (Dialogues), due to the atmospheric disturbance and moisture in the sky, thought they witnessed UFOs, which were actually known stars appearing to move (of course they do, slowly, as the Earth rotates), due to the atmospheric disturbance. So this was good basic training for all new Dialoguers.

It was also heartening to see how well acquainted the group was with the familiar airplane flash, and its consistent trajectory, remaining on its path flight line, until it was too far away to be seen.

Chemist and student in alchemy, Hans Peter Diehl, who saw a UFO before the event, and with Ananda, at one point did report a red object moving very fast. The object was in the northern hemisphere, in fact directly north, and travelling in a direction of west to east. He has this on his audio record log.

No one else of the group witnessed this object, however, so it is just there for the record, in this 1st rudimentary report released through the Grail Ring and Dialogues' Unity Units email list, and Facebook.

The Dialogues with the Cosmos webpage, will have the complete report, with precise timelines.

Furthermore, it MAY be noted for future efforts, that a site that is by an electricity generating DAM, may be an "anti-star-gate" zone!

An electrical water dam is a blockade of energy that is being extracted by the pressure of the blockade of high mountain waters (rich in all the alpine elements, including those of the rare earth elements, and nuclear deformed orbitally re-arranged monatomic elements, in cooper-paired configurations, coming from the glaciers. The possible objective significance of these elements, in regards to the, so called, "star-gates", is explored in Report 3, and in our 2003 "SION DOME" paper of this Swiss Alpine "Star Gate" and glacier region).

Some of the 1st rudimentary protocols were applied, enforce, at this zone (which usually results with a response to a sincere protocol being engaged by sincere individuals); and from at least some of the group's description of their own experience of the energy of the place, being "felt" as rather flat to some, despite the spectacular setting (also causing the onset of bodily cold from the Dam waters coupled with the alpine wind, and exhaustion, as most of the group had travelled far that day or the day before, which was also the case for some members of Dialogues I, in balance, however).

This combination together with the virtually "no show" of the UFO, or Other side of the Dialogue, resulted in some members of the group choosing not to go up to the next high mountain site the following night, and thus missing out on the sightings, and interacting with the palpable presence.

The fact that it is a Dam that generates enormous amounts of electricity.... makes us note, that future Dialogues with the Cosmos, by any Unity Units, or other Starwatching group efforts of similar civilian service — may have to consider the too near proximity of an electrical Dam in their Dialogue site.

In contrast to this, the authors 1972, 1986, and 1992 UFO sightings, including with others, interactions, and contacts by the Swiss Glacier of Ferpeckle, where an electricity generating dam is positioned not too far off from the sites of some of my UFO sightings/interactions, does give a juxtaposed reflex to this notion.

There are very probably other factors at hand, and the Other is a co-participant choosing to participate in the Field Work, or not, for the reasons they choose.

This author has had many a night, including in July 2008, out all night with no remarkable phenomenon, despite protocols being used. And the following night a continuum of sightings, and in this case a complete ETI-RV/VR “download” on “exo-sexology”, occurred. Ending with this author filming one of the plasma-holographic living ships amidst the bright blue Norwegian morning sky, on a Sonny photo camera, that had a film mode.

There are simply times, when the Other chooses, to not show.

Never the less an intense and sincere invocation protocol was applied by the largest gathering of this group, addressed to the Cosmic Intelligences, on behalf of mankind.

Whilst numerous Dialogue unit units continue to see UFOs, there are at least a few, who did not see any of the UFOs, due to not going up the 2nd night, but who continue their utmost to Dialogue: “I have not given up yet,” one long time friend and unity unit reported.

The August 23rd Keynote Briefings were well transmitted.

Whilst Dialogues I had little time or space to properly present the hundreds of Keynote animated slides on the detailed levels of protocols on the subject — Dialogues II, which was 3 and half days, did manage to show, around 65% of this Briefing Material on the protocols.

This makes these Twin Alpine Dialogues with the Cosmos a complete twain.

————PART TWO————

THE SILVER VALLEY DOME — ANOTHER PRESENCE & UFOS AMIDST THE SILVER MOON OVER THE SILVER VALLEY & THE CASSIOPEIA LYNCH PIN

Following another day of briefings in the Silver Valley, the night sky was inviting, and a convoy of the group headed up for the mountains, to arrive at the high mountain site of the Obere Wiese, above Silbertal, well after midnight, into the early hours of the 24th of August. Resulting in some good UFO sightings, including the “time jumper” and “direction changing” kinds.

This site had been selected as the 2nd prime candidate based on the UFO sighting there during a scouting of this area, by Helmut and Patrick Zudrell, at around 3AM, two weeks earlier.

Furthermore, it was truly a site that overlooked the Silver Valley of Silbertal. And it was this region we had been assigned to work with.

Due to the rough nature of the passage to this high mountain site, and due to the experience of the night before, or for health and other reasons, some people chose not to go up to this Obere Wiese site for “Field Work”.

However, this also resulted in other Input data relevant to the ongoing unfoldment and detailed Interaction Criteria of Dialogues with the Cosmos, to emerge, and be catalogued in this civilian Archive of Cosmic Contact.

The author went up amidst two scout cars, packed full with people to the maximum. These two scout vehicles having been granted local council permission to use a hunters rough mountain off-road track to gain access to the site, not far from the Bartholomew Berg.

Another part of the convoy, who did not have the permit, had to go another route by car and walk for two hours to get to the same site, 1,800 metres up, over the Silver Valley.

With the two permit car groups walking in strong moonlight, taking a 30 minute mountain path route, we could arrive to the site and begin Field Work, once equilibrium had been gained. Most of this group immediately “FELT” a STRONG PRESENCE and beautiful energy at this site. Of which some started to engage “Operation Mountain Light” protocols spontaneously as if guided, which includes those movements of “Unitegrity” (taught in 1997 and 1999 by Ananda), and other PHLne tuning exercises, some of which are similar to Tai Chi, and Chi Kung. And unification of macro-sized power objects with other objects, and blending of the elements, on different ratios of scale, to engage what the author Remote Viewed, as the “Silvertal Dome”.

The moon was high in the sky, and very bright, with the “felt” presence of the Other, “joining in symbiosis” with the Chi-like movements of the body. Where the body is directed by coherent “Aether-like” energy (akin to *Chi/Ki, Prana, Aether* etc) — specific hand-finger positions and arm body movements proceeded to engage the “Silbertal Dome”.

This Silver Dome-like field was experienced by the author (and I believe also by Hans Peter Deahl), and brought out even more by the silver moon light.

Later, Helmut Zudrell, the co-organiser of the event, would relay his years of working on precisely this “Dome” with Vortexijah (8Hz whole body phase conjugation of all 8 opposites), techniques. And unifying the very SAME mountains Ananda and others were being moved to unify. This was unknown to this author, before it was sensed this morning of the 24th.

In checking later with the other members of the Zudrell family, they confirmed Helmut’s years of work on those mountains, and their own experiences of the “Dome”, or things related to something similar.

This author has experienced this “dome” phenomenon, in other “star-gate” zones. One set of papers, called, “The SION Dome”, goes into great detail, including analysis of the elements of the periodic table found at that site, where this author had multiple UFO contacts.

In the Dialogue briefings, we presented NASA photographs of some of these star-grid strings that go into space linking to the planets and the moon, from the surface of Earth. Just as our 1980’s “Emmanuel” & “Galactic Council” recorded communications describe (published on the public record first in 1987, and in book form in 1992. Long before the discovery of these “space elevators” in NASA photography).

A Dome such as this, can be likened to a portal in time and space: intraterrestrial; surface-elemental-geological; atmosphere-sky; space and Aether; unified by the Aether-Beams of the UFOs: Unified Field Objects.

From this authors experience, summarised in the later section: “The Silbertal Dome of the Silver Valley” of this report, there may be indicators that beneath the Ubber Weise region, and other regions linked to the Dome, there could be a functional “trans-dimensional” holographic base. The details of this are explored in the above mentioned section, coming, that explores more “far-out” territories.

CLOUD BUSTING & UFO WEATHER ENGINEERING

As our Operation Mountain Light and Elemental Fusion, “Field Work”, commenced in natural accord, by spontaneous-intuitive link-up, Hans Peter Diehl, together with Ananda, experienced the sensation of the known phenomenon of “cloud busting.”

Cloud busting exercises which engage the frontal amygdala re-routing of emotional/somatic energy (which is a blissful-unified coherent processing of the same input CNS information that is normally routed through the rare amygdala as our default pathway, and normally processed as “stress” and become “stress packets”), and one visually, with WILL, makes a hole in a cloud, where the observer is focussing their intent.

The Aether and Chi flow and flux, the “Presence of the Other”, with the Dome, amplified the “cloud busting” abilities, on behalf of the group.

In this case, our arms and whole body, moving with the coherent energy, were sensed to be acting like heart-will laser amplifiers that cloud busted the sky above — maintaining a clearing above the site, as the dense cloud banks warped to either side.

When focussing on other “Field Work”, and the sky became overcast, and the rest of the group had not yet arrived to the site by foot, Ananda and Hans Peter and others, again engaged in spontaneous “cloud busting” or related Silbertal Dome work that was moving through them, with the presence of the Other — resulted minutes after in a clear sky largely only above the site.

Whilst the above experience will boarder on the credibility of possibility fence for some, we simply must include these for the record, as I believe such experiences will continue to emerge from future Dialogues with the Cosmos made by this author or by other Unity Units engaging the Dialogues protocols, and from other civilian Skywatching groups.

In Dialogues I, the group went up to the Swiss Alp site in the deep hard rain of a thunder storm. Even when this author left the car, and approached the site for the “Field Work”, he was under umbrella in the rain. Only after 1st protocols, and all the group were ready, did the sky clear. On that occasion the Other side of the Dialoguer’s, the “UFO ‘Other’”, appeared to engage the cloud busting for the rest of the night until dawn, as a form of “UFO Weather Engineering”, much as the Unified Field Object’s synthesise the space-time vector-matrix of the fabric of our holographic reality (as the Other, relays it via unusual manners in gaining information, or a “source line” translation from the UFO, in “ETI-OS-NU” transmissions).

THE PRE-SENCE OF THE ‘OTHER’ CO-JOINING

During this spontaneously instigated Field Work “Operation Mountain Light”, “Unitegrity”, and “cloud busting” time, absolutely no visual UFOs and related unusual phenomenon appeared. Not even satellites (the “Integral” satellite was shown in astronomical applications of the iPad to be just above us, but, like most times, it was unobservable with the naked eye) — seemingly just as the night before, where also not even a single satellite was seen by the Silvretta Dam. Which can be a little unusual when hours are spent stretching the neck muscles looking up, at an altitude of 2,200 metres!

However, there was a strong palpable feeling of the “presence of the Other”, as noted. They were there in other manners that were deep, and close in proximity. This author is very familiar with this, during many adventures with the UFOs, such as in the case of going inside a UFO with another witness in early 1989.

THE POWER OF THE ALL-ONE MACRO VERBALLY ADDRESSED

There seemed to be an underlying soft skepticism to the group, like the personal (“I am not worthy”), and social (“there is nothing out there”), that was more prevalent than in the first Dialogue. However, in balance, there were numerous civilians in Dialogues II who have had clear UFO sightings, and there were some civilians in Dialogues I that had not had any.

Minutes before the rest of the group arrived, and sensing this personal soft-skeptical field, Ananda decided to use truly sincere coherent intent, commonly called: “the Power of Prayer”.

There have been numerous science studies documenting the effectiveness of prayer on specific targets, with significant outcomes. These have been repeated studies, and some are double blind. The data acquired by the rigorous scientific methodology, demonstrates an effect on space and time, by the sheer sincere power of prayer.

Which coupled to the REG: Random Number Generator effects of focussed intent and will on the outcome of numbers, studies engaged by Dr. Jahn (NASA, US Defence Department, Princeton University), tests repeated over generations, and similar empirical research studies — indicate their necessity amidst the protocols of consciously engaging UFO sightings, that some have come to call CE-5 (we explore this further in Report 3).

So, Ananda, prayed REALLY REALLY REALLY HARD, on behalf of larger mankind, that at least 3 “Star Ships” of SOME kind would show themselves for this group, in this MIDWAY civilian effort, on behalf of mankind.

THE DIALOGUING UFOS OVER SILBERTAL — IGNITION WITH SONG

The remaining members of this group arrived, rested from the intense steep mountain walk in the moonlight, and then assembled.

We engaged the protocols, and then followed by “Unity Pulse Breathing” techniques. Then rolled into a powerful session of *Rg Veda* mantras.

Although not utilised in Dialogues I, the *Rg Veda* is often to be used in the Dialogues (as we have used it in other working sessions for many years), as it is the oldest manuscript of mankind. With remnants found at the now estimated 12,000 year old agrarian culture archeological sites along the dried up *Sarasvati* river bed in Pakistan, where some hymns of the *Rg Veda* are found intact in pictographic form.

The *Rg Veda* is said, and itself states in its *Anukramanis* appendices (ascribing its authors to each of its hymns) — to be authored by the “star gods” and ultraterrestrials, themselves, no less, and to not be authored by humans. Although human-based “contactees” with the “star-gods” and “ultraterrestrial” sages, are also included in experiencing and seeing the *Rg Veda*.

The precise ultraterrestrial “star god” families scribing hymns of each of its 10 books, are given in detail. One of the oldest family is the root of our angels, the *Angirasas*.

Apart from being power sound lasers, the *Rg Veda* mantras also hold holographic nuance, and primordial genetic mathematical syntax, in their potency. There are hymns that directly invoke the manifestation of the “star cars” of the “star gods”, and the syntax of creation:

“The Vedic mantras are in the un-decaying remotest sky, where all the space gods reside. One who does not know this, what will he do with Vedic mantras? One who knows that, the space gods stay with him.”

—*Rg Veda* 1.164.39

Also sacred mantras from Egypt, the Buddhists, and the Christian and Hermetic Gnostics, were used. Amidst our resounding circle, the UFOs emerge.

From the notes written directly after the nights sightings:

24th August, Obere Wiese, Silbertal — THE UFOS BEGIN

It took quite some time for anything to appear. But there was a presence there. Lots of energy work first, and clear guidance that way.

With each of the sightings, the group reads the actual time. The actual time was also checked on iPad’s and iPhones, which are synchronised to realtime.

The 1st sighting occurred during the mantra session:

2. 3.05AM

PtahKha mantra (Egyptian power mantra and key sound code activator to the “hidden records” in certain tombs, meaning “Star Car/House of Ptah”), made by the group circle.

At 3.05Am, Patrick Zudrell, Malis Zudrell, and Helmut Zudrell (the co-organisers of the event, and guardians of the “Silver Valley Dome” for many years it later became apparent), see a UFO “pulse-flasher”, engaging the irregular laser-like pulse flashes, and an object moving from where each of the pulse flashes came.

It appeared by the Constellation of Cassiopeia, and over the group. The group was deeply raptured in the mantric energetic momentum and the effects instilled by this mantra on the surrounding environment, and were not disturbed by the Zudrell’s. More details pending.

3. 3.20AM

The mantra session closed. Ananda prayed hard, along with others. And the group was about to go, when somethings happened. A handful of people, had a visual, including:

JCL (Jean Claude, Geneva),
Margot Heim
Hans Peter Deahl
Patrick Zudrell,
Helmut Zudrell,
Malis Zudrell, and
Judy Hall

At 3.20AM, they saw an object appear fully “powered-up” and bright, cross by the Andromeda Constellation, under Cassiopeia, from north-east, going towards the Moon in the South. Moving quite fast, it became rapidly dimmer, before fading out. Or “cloaked”, by the time Ananda was pointed to it, with his hand holding the laser beam of the laser pointer, and Patrick moving his arm.

In a discussion between JCL, Patrick and others of the group who witnessed it, it was agreed upon that the duration of the object was at the very least 8 seconds long.

JCL had initially stated 5 seconds, when the group was fine tuning this report in common mutual agreement. But Patrick immediately objected and stated at least 8 minutes. And the sequence of time when it was panned out, demonstrated a longer duration.

It had to be at least 8 seconds, and probably more: to have the initial visual contact with the UFO powered-up, have Patrick exclaim it, then point it out to Malis and Helmut, and then JCL, as Hans Peter got wind of it and exclaimed his cognition of visual contact, and then get Ananda over a patch of mountain field to Patrick in the moonlight, without falling over anybody on the ground, cow dung, or rocks; to then point to the UFO with the laser pointer, Ananda not seeing it, pointing the laser in the wrong area, until, struggling for a while, Patrick managed to get the laser to show the precise point of the object.

Ananda, only saw the very last split second of this one. The panning out of this time, makes 8 seconds highly conservative. It was a first for JCL, and he was elated that others had seen it too, he did not mind to be proven wrong on this one, regarding time. His exclamations of amazement were far more significant.

Patrick Zudrell first saw and pointed out this Powered-Up UFO.

Going across Andromeda to the Moon, under the constellation of Cassiopeia.

4. 3.26-3.27AM

Some six minutes later, a “pulse flasher” UFO clearly showed itself under the “M-W” shaped constellation of Cassiopeia, starting nearby the constellation of Cetus.

It made many pulse flashes, at different intervals, different intensities, and different distances in relation to each other. And some of the pulse-flashes going in deeper than others.

This “pulse flasher” was apparent for over a 1 minute and quite some seconds more.

The UFO also becoming a “jumper”, being observed to take several “jumps” when the object was visible, so it was at least a “jumper” if not a “time jumper”, most witnesses agree. Seen by:

Petra Degenhart
Margot Heim
Ananda Bosman
Judy Hall (?)
Helmut Zudrell,
Patrick Zudrell, and
Malis Zudrell,
JCL
Hans Peter Diehl, and
Others

Significantly, the end of its trajectory path, before disappearing completely and not reappearing was right next to the full moon hanging high and directly over the Silver Valley.

This UFO also made its last laser-like “pulse flashes” very close to the full moon, at the end of its trajectory course.*

*NOTE: The author has witnessed “Athena’s” UFO over the Svindal lake of south Norway, arriving at the harbour right in front of his house, when living there, together with his mother, and Martina Kima Gottschalk (who both have testified to this event. Both feeling as if they were looking back out of the love-consciousness that the craft was experienced as. Now extremely near to them, and the sky still blue with some colourful hues of the twilight also in apparent, that September 23rd, 1993 — suddenly the ship, pulse flashed, and was gone. Or rather had now jumped into a meadow far away on the left, amidst a forest and was dancing around there. We have many numerous sightings of a final pulse-flash and warping out. Also in Dialogues I).

Hence, this UFO’s magnitude was brighter than the full moon hanging high, and its pulse flashed lasers were of a coherent light, of quite some greater magnitude than the high bright silver-white full moon light.

Ananda Bosman checking with the Apple iPad “Starwalk” application during some of the duration of the sighting (latest version with its full satellite data base upto date) — no satellites on “Starwalk” satellite data base correlated with the moving UFO pulse flasher. Neither in the visible magnitude, nor in non visible to the non-aided eye range. The moon and constellations DID, however, correlate perfectly. There was no mistaking, the software was tracking the correct coordinates.

This program uses the compass inbuilt in the Apple iPad and the longitude and latitude of one’s actual position, as well as the actual time, to move the stars accurately in real time, so that the screen moves according to the stars above, as one moves the iPad that way.

So as one turns the iPad to the moon, on the screen one will see the moon in the actual position it is in the sky, or accurately chartering a constellation like Cassiopeia.

All of the classic satellites are in Starwalk’s data base (a lot of those are not visible with the naked eye, even if one has a crystal clear sky where one see’s the Milky Way, like in Norway, it is near impossible to see them without the aid of a telescope, even binocular do not show these kind of satellites, of which there are enormous amounts) — as well as visible magnitude satellites and other objects like the ISS Space Station, (which is visible with the naked eye, even, at times during the day, and can move faster than many satellites).

There was absolutely no object that could in any remotest sense account for what we were seeing with this pulse-flasher jumper UFO variety, also in a variety of magnitudes of brightness, to the object itself, or the environmental context in which it appeared, as well as to the nature of the brightness of the pulse flashes themselves.

Checking with the “Redshift” application satellite data base (latest version, all satellites loaded), also no visual magnitude satellite crossing the sky at that time and that position (the Redshift application does not move in realtime like Skywalk, but one can look for additional satellites, and it can be backset to the exact time of the sighting, with the correct coordinates of the place, time, and constellation backset, plus the moon etc.).

This object not only pulse flashed, but also made some “jumps” in it’s trajectory — appearing ahead of where it should be, given the previous speed it was seen at.

Patrick Zudrell described later to the group when fine tuning the initial report of sighting, that he observed a kind of cloaking phenomenon with this UFO, that there was a “small dark ring around it before it jumps”.

Some of the others murmured something in agreement to this, but perhaps slightly at variance as he describes it (?) — Patrick was amidst the younger side of the group in age, and does have remarkably good long distance eyesight, at 26 years.

The author has seen this dark “cloaking-like” phenomenon, like the warping of time and space, for many years, associated with the “jumpers”. This was also evident with the jumper of Dialogues I at the end of the 1st night. As well as with one object, that simply cloaked itself out of this space and time fabric.

5. 4.05AM

A fast moving object lower down than the others appears suddenly IN the Cassiopeia Constellation.

Ananda’s head is turned there to see it suddenly appear there, and then alert the group to the Cassiopeia area by voice and then by laser.

Judy Hall was one of the earlier ones to see it and exclaimed: “now thats more like it.”

This object, which first appeared/manifested at its brightest, moved along quite fast through the Cassiopeia constellation (yet MUCH slower when taken relation to that of a meteor), towards the cardinal north, during which it gradually powers-down its brightness, and then disappears completely.

This was seen by quite a few people of the group, including

Yohann Oetheimer
Dirk Laubach
Nabor Leubach
Judy Hall
Ananda Bosman
Patrick Zudrell,
Malis Zudrell,
Helmut Zudrell,
Hans Peter Diehl
And others

It’s plane of trajectory was followed, but it did not reappear, even though it was moving towards the darker north, where the stars were brighter because the moonlight was at a further distance, and the sky was clear.

In fact, once the UFO sightings started, the night sky remained remarkably clear. The previous cloud banks, that were “cloud busted” apart, had cleared the area. Several hours later began torrential rain that lasted for days.

This UFO was lower down than the other objects, more the “normal” proper “height,” although again the moon was very bright this night, so it may not be an exact science.

In its nature this object did not get brighter and “power-up,” “jump”, or “pulse flash”.

It did came out of nowhere, starting out brightest and lower than the other UFOs, well below the lunar light gleam, and it did get dimmer, and then disappear.

Having started at its maximum brightness suddenly appearing in the Cassiopeia constellation, as it moved towards the north, it maintained its brightness and then gradually dimmed down, before de-manifesting completely.

It did not reappear along its trajectory towards the north, when it should have done if it were a satellite, as the stars were clearly visible there.

No satellite in the “Starwalk” application could account or correlate to it in realtime. It moved relatively fast, faster than most satellites and the space station (which at another, non visible, area of Earth at the time).

Its sudden manifestation in Cassiopeia and “power-down”, and “de-manifestation”, remain the attributes of interest to this object, coupled to no known match in the satellite data base, so far.

This ended the Field trip, as the two parties divided and commenced on their journey down.

6. 4.27-4.29AM

Ananda walked ahead of the group to the two scout cars, and Judy Hall followed him rapidly in the moonlight — whilst the terrain was rough, and the remote wild mountain paths winding, the full moon guiding perfect footing, along with the “inner light vision”.

Once at the cars, Ananda observed two bright intense pulse flashes lower than any UFO before it, and alerted Judy to them.

This pulse flasher UFO was an object going from north to west, under the Cassiopeia Constellation, and crossed Andromeda.

There were around 7-8 pulse flashes, that this object emitted. The UFO object itself was at times visible as it moved.

This author also discerned several “jumps” made by this Unidentified Flying Object pulse flasher. Of the 7-8 overall pulse flashes this UFO released, Judy Hall saw around 4-5 of these pulse flashes — some of which had a distinguished impact on her.

This was the brightest and closest Unidentified “Flying” Object observed, so far.

Judy witnessed most of the trajectory of this pulse flasher UFO, whose passage under Cassiopeia, crossing the Andromeda constellation, took more than one minute and a half in time.

There were periods where the moving object was also not visible, and could only be discerned again, when it brightly pulse flashed, sometimes at odds with its estimated trajectory speed.

The “Skywatch” data base had no matching visual magnitude or other satellites in its data base even remotely near, as the iPad was used during the course of this closest range sighting.

Judy was elated, as she felt an inner contact, its impact, and arousing of her spirit... Ananda was happy for her, sensing the noted transmission and hadron/Aether coupling, and more :-)

7. 4.26-4.27AM

The other group now taking the 2 hour mountain walk back, also witnessed a spectacular UFO, which not only pulse flashed, powered-up, but also was a “jumper” and its jumps also changed the direction of its travelling trajectory. Witnessed by:

Yohann Oetheimer (Anthropology master degree)
Dr. Carlo Oetheimer (professor of Morpho-Geology)
Helmut Zudrell
Anita Aschenbrenner,
JCL (?)
& others.

It was Helmut Zudrell who saw the first UFO’s pulse flash as the object was coming from the direction of the north. And then followed by the object releasing two bright pulse flashes, travelling from north to south, at which time other group members already were joining in visual contact with the sighting after the verbal exclamation of the first pulse-flash.

The UFO then significantly “jumped” to a south-west direction, the group observed (confirmed when the witnesses were assembled and the details of this report fine tuned), and then Helmut describes that the UFO may have jumped AND changed direction to a western travelling path!

Yohann Oetheimer, says with the last pulse flash, “when it jumped, that was it. No more. It disappeared completely.”

It was the lowest down object for all of the group that had seen the previous UFO sightings. This also was nearby Cassiopeia, and immediately to the left of the “MW” shaped constellation, the group agreed, when assembled, and fine tuning this report’s details.

Shortly afterwards, according to the objective measure of the time, Ananda Bosman and Judy Hall, saw their UFO pulse flasher and jumper also by Cassiopeia, but travelling beneath it, and crossing Andromeda. Of longer duration, the time record of the iPad demonstrated, going at least two minutes further ahead in time than the other group's sighting, which occurred approximately a minute before (their time records also used the Apple actual time).

This gave a clear conclusion to the sightings, and much of the group was left with an elevated state of consciousness, as well as an overall pervading sense of well-being, for many members. The UFO Inebriation effect was very prevalent in Dialogues I, due to the quantity of sightings, and the close approaches. Especially strong after the 1st night.*

**NOTE: This author has experienced the "UFO High" brought to the various heights of Ecstasy. An all night session in England, in June of 1987, with 3 other witnesses, had the strongly summoned UFOs come lower and lower, with their pulse flashes, joining into one object, or objects coming out of objects. Also low proximity "green spheres" and "blue spheres" a little like "fireballs" were observed.*

The lower they came, the more love one felt, and the more one "beamed" with the glowing "heart Sun".

This author was 17 years of age. It was too much for his mother and her partner, Jeff Sedgwick, at a certain point they had to turn in to bed, as the UFO energy and approaches got lower and lower down.

But, Francesca King (then 27), and Ananda continued to engage them, in closer approaches. The Ecstasy they built up was a high state of psychoactive somatic bliss, bordering on the psychedelic (no substances were inebriated. At this point the author was such a puritan he did not even drink coffee or alcohol, and it took years before shamanic medicine would be consumed, with reluctance, but upon insistence as a tool, by the Other).

Champaign-like inebriation also followed a predicted Christmas day manifestation of "Captain Rama's" ship, who had contacted Ananda 5 days earlier, occurring in Denmark, on the main island that Copenhagen occupies, near a Fjord. The exact time of the manifestation was given to both Ananda Bosman and, Kai, the then manager of the Sheraton hotel, sitting next to him and in the "beam".

The group that went out with Ananda that saw the first pulse flashers, had one woman, Mona, undergo a whole experience in seconds. Within seconds amidst a pulse flash, she experienced herself transported on the UFO, and then projected through a holographic screen onto another planet, and downloading all her memories from other places. And then returning, after a long voyage, at the end of the pulse flash.

*When the rest of the group of psychic, Marina Monk, came, following her, this author was pointing out to Marina where the UFO had manifested. As the author pointed, so another pulse flasher manifested in the precise area being pointed to, in golden pulse flashes of light coming from a moving object. All this Danish group got to see that Christmas Day sighting of 1989. Afterwards, all agreed they felt a little drunk, like Champaign, from the energy (this sighting is recorded in our 1992 published book *The Light Of Emmanuel*).*

BEAMS OR RODS OF LIGHT

Researcher, Piet Tummers, amidst the group, did not see any of these UFOs this time, but he saw "light beams", or "sheets of light, blitzing" at either side of him. He also saw these on the first night. It must be emphasised that it is always when Piet is standing, he insists.

Like, Brahma Marina Lugli, in Dialogues I, also saw similar "beams of light" phenomenon, as well as "light sheets" coming down onto the "Field Work" Dialogues I site, from the sky.

Such "beams and rods of light" are described in the communication contacts following the UFO, of this author obtained during the 1980s.

The above 7 sighting entries are based on “summation of day two, notes, made at 6.22AM ,24th August, 2013, Silbertal”.

~Ananda Bosman

ADDITIONAL ASTRAL/IMAGINATION/DREAM BODY INPUT — 10 Before 3AM

In Dialogues with the Cosmos, the UFO Intelligences’ living computer systems not only operate on consciousness sensitivity, but also are fully hadronic in all the new planes of the hadronic nuclear physical fusion planes.

Thereby, the “body of the imagination”, also known as the “dream body” of the Theta brain rhythm band going to the Alpha brain rhythm band, is considered to be an I.T. (Information Technology) System, integrally incorporated within the ETI-OS (Operating System).

In classical terms the dream/imagination plane is called the “Subtle Body,” or the “Astral Body” in the Esoteric traditions.

They are an integral concept in the “3 World Planes” cosmologies of the *Rg Veda*.

A female participant (who does not want to have her name mentioned), who has been working with Ananda since Time Gate 1996, was one of the persons who did not make it up on the mountain on the 2nd night, and did not catch either convoy of cars. So she decided to participate on the subtle plane level.

She was in a half dream state (theta-alpha, the twilight plane of the subtle/imagination body), neither asleep, nor awake in the usual waking consciousness sense, and this she estimated to be perhaps around circa 10 minutes before 3AM, quite a close estimated time to the time of the 1st UFO sighting by the mountainside group.

In this twilight state, she was seeing, with eyes closed, a big whitish glowing UFO, so that the silver valley was in this glow.

It was a large UFO that filled the Silbertal valley with its glow.

It had a bit more colour than silver, like a melon or apricot colour.

It was moving very smooth, without any sound and without any pulse.

Very directing through the valley.

And then she was going outside and watching that there was a UFO, and realised it was beautiful, and then that it was gone in the direction west of the valley.

This perfectly reflects our “Operation Mountain Light” experience of the “Silbertal Dome”, the “Silver Valley’ Dome”. Which was PHIne tuned during the Operation, in precisely the points that Helmut Zudrell had specifically worked with, and also had experienced as a dome, of which Ananda was unaware.

Helmut saw his 1st definitive UFO in early 2011 with his wife Malis, at their mountain house, some 1,440 above sea level, Kristberg, overlooking Silbertal. This slow pulse flasher, moving through Orion’s belt into the Unicorn constellation, made a strong impression on both of them. Malis stated that “Ananda will be coming”, based on the sighting. The next day Simone, my partner, telephoned and said we would be coming. And that I would stay on to continue writing on my multi-volume book series: *The Manu: An Omnidimensional Artefact at the Genesis of History*.

The large UFO with its glow filling the valley, combines the physical elements that unfolded mountainside, in unison: the Operation Mountain Light, Unitegrity, and Macro Elemental Fusion work, anchored in accord and by the Chi/Aether guidance of the Other and the Intelligences of the Silbertal Dome itself; Protocols of invocations, as well as personal prayers; with the breath and sound work alchemy of the group; and then with the UFO manifestations, and midway meeting pulsations, that were empowering the Silbertal Dome.

In the female participant’s vision, the “Silver Valley Dome”, our Field Work, and the UFO’s pulse alchemy Work, are united into a single Unified Field Object.

Imagination/Dream Body input, will remain a valid criteria, recorded within these civilian archives of these European Cosmic Dialogues.

Dream input, has often figured in UFO sightings. Especially those in a Twilight (Theta-Alpha) state, that the female participant experienced.

Yet Lucid Dreams may hold valid information value as well, as lucid dreams are an I.T. System, at times probably in neuro-genetic syntax, and the UFO appears to operate with computational systems whose OS incorporate ALL I.T. Systems. All Information Technology systems are Integral to these UFO Intelligence's living holographic computation systems, that are consciousness sensitive and registering.

This barely scratches the surface, even though this superficial description has stepped well within the boarderland of the Numinous, for most, including those "nuts and bolts" UFOlogists and disclosure advocates that insist they know that the Intelligence behind the UFO are physical ET's coming from a reality whose boundaries are like our own (from the Cartesian world view, whose mechanistic universe world view has been scientifically proven wrong since the discovery of "chemical waves" acting in "reaction-dispersion" patterns of a non-linear fractal nature, and since the Brusselator Experiment of the 1960s, which demonstrated such phenomenon organised by the non-linear dynamics beyond the boundaries of mechanical science. However, much of social intelligence, within mankind still has to update to this post-Mechanist, post-Cartesian world view of the universe and the nature of life".

ETI-OS-NU

"Communication beam" contacts, where the UFO "Intelligences" Intensions are fine-tune beam transmitted (via hadronic "Aether" Beams and Tensor beams), and translated through the hadronic horizon of the *In-Vivo* DNA, and the Central Nervous System and holographic field, into their Earth semantic equivalents, instantly. Occurring "faster than you can think."

These, started again, some weeks before Dialogues I. There had been a long break in this form of communication since December 2001 — a more than 11 years vacuity, although other forms of communication methodologies were focussed on instead (there may be a heliosphere relation to these). So it was a surprise to have it begin again, perfectly, instantly, as if taking off from where we left off in 2001, in the form they had been transmitted since 1991, some 22 years before.

On August the 21st, a communication transmitted from "Athena" came at 19.09, which relayed the following:

"Greetings I am Athena,

"We are in an Interstellar Vehicle over this valley. This is not a dream, but an actual vehicle of Awakening.

"We ask that you watch carefully each participant and how they react, or over-react to our approaches, and to the direct beaming of information consciousness into their systems.

"Be aware, this will activate certain latent programs in each individual, that is present.

This is a well thought out Operation which will trigger new realizations and install a certain Awakening.

"We have worked here now for some years, and these Dialogues are of prime essence and ready to be made realized, in this new venture and adventure of man.

"We are with you, in various forms, not only in star ship form. There are other varieties that are emerging for these events. They will become more present by each unfolding event.

"I am Athena with H'Aton present.

Khraton/Ptah is working in the higher levels engaging the Omni-Network transducers "that we Operate by to be here, in a manner similar to your synthesis of elements and molecules.

"Be All-One and True in your Being. We are With you TRULY, and we share much now this time.

"There will be another communication.

“Aton”

Whilst this message, initially does not appear to contain too much information — upon closer examination, in fact, some details are quite precise, like the vision of the female participant (mentioned on page 17) of a vehicle over the Silbertal valley.

No one at all, before this Report II that you now read, had seen this message. However, it is a computer file, unchanged from when it was transmitted, in order to document the date and the time (screen shots have been made for documentation purposes, and the file can be examined). I did record, as requested, and as best I could remember (as these communications happen at lightening speed, in an altered state of consciousness), how “each participant” would “react, or over-react to our approaches, and the direct beaming of information consciousness into their systems.”

In retrospective, this has become an interesting task. Becoming especially aware how this “well thought out Operation” did indeed “trigger new realisations and install a certain awakening,” in highly specific individuals. Also in highly specific key manners, after the event. As well as some surprising arisings in others.

Furthermore, this communication predicted the felt palpable presence of the Other on the 2nd night’ site, powerfully present, in “we are with you, in various forms, not only in star ship form. There are other varieties that are emerging for these events.”

Furthermore, in the first communication in almost 12 years, 4 days before Dialogues I, Athena broke the silence of this line, and also relayed new manners of interaction:

“I am Athena, with H’Aton in the relaying distance.

“We have fathomed a sense of operations that will unfold in two districts that are to come up [these became the Alpine Twins of Switzerland and Austria for Dialogues I & II].

“They will be enabled when the progression has reached a peak of energetic upliftment. This will be done through, meditation, breath work, and Being [required in the Dialogue II team’s Field Work].

“Know that we are there, in 4 forms of manifestation [pulse flash; power-up; jumper/time jumper; combo].

“Be welcome, and know that we have a multitude of forms that will be conveyed as you will see fit.”

—July 15th, 2013, 2.02am

On August the 22nd, at 1.21AM, well before the Dialogues II began on the next evening of that day, this message was transmitted by “H’Aton,” as the 2nd message predicted by “Athena”, which appears to accurately describe what was to take place, including the number of nights in which the demonstrations would occur, and the nature of what would be imparted:

“Greetings, my brother this is H’Aton.

“We are in the western hemisphere working in engaging the simultaneous activations of the Multiversal sensorial burst that will engage mankind into novel forms of understanding that have never been brought to this planet before.

“It is this function that I am playing in this event.

“It will be made manifest in one of the 3 days.

“You will see this clearly, and know what this is when it happens.

“Now to decode the further assignment, here is the key

“8jsihdspuhpuh-[8y PN;CNP`ZH-[9 HF2

“WE FULFILL THE SENSE of the All-One Creator by instilling this into you tonight.

"I am here with a fleet of craft that will make performances and engage the operating systems of this planet.

"Do not be surprised when these become quite obvious for most.

I am H'Aton in Service of the One Creator of All-Oneness. Adonai, my brother, Aton."

The "Multiversal sensorial burst", to be "made manifest in one of the 3 days," which I (Ananda) "will see clearly, and what this is when it happens," can only clearly refer to the UFO sightings of the 24th, of 4.26-4.29AM, as they describe "working in engaging the simultaneous activations" of this novel burst.

It was the almost parallel sightings by the two parties of the group, of the "pulse flasher" and "time jumper" by the Constellation of Cassiopeia, that gave the most powerful and touching pulse-flashes, and had the deepest impact and lasting effects on those that witnessed them. Furthermore, in their manifestation, were also "time jumps" which have the quality to hold other spaces beyond our own (when such phenomenon is referenced to theories on such propulsions within our latest new physics).

The 1st sighting by Judy Hall on the 1st night was the faint pulse flasher in the west, fulfilling H'Aton's, "we are in the western hemisphere." Also the last object, also seen by Judy Hall and Ananda, was going from the north to the west in its direction, crossing Andromeda — thereby, completing the assignment by going back to the "western hemisphere" in which they were located and operating from.

Thus, sighting 1. Sighting 6, and sighting 7., were in accord as 1. Coming from the west, and 6 and 7, returning to the west.

Furthermore, the female participant's "Subtle Body" twilight interaction mentioned on page 17, also had the large mothership UFO go off into the west of the Silbertal valley.

As with the others, the date of this received message is tagged to the computer file it was written in, showing it was written days before the Friday night sightings of Ubbber Weise (screenshots taken for the record).

The code syntax transmitted in the 2nd communication transmission of Dialogues II, has been used since the early 1990s, and holds a significant "ETI *Ka-Ba-La*" semantic code language. This will be explored specifically in an "ETI-OS-NU" based Dialogues with the Cosmos".

CASSIOPEIA — CLAIRVOYANT INPUT: "NU KIDS ON THE BLOCK"

On Saturday the 24th, after awakening, the 2nd person who spoke to the author was a 1 year and 8 months old child, who said to Ananda, very directly, and strongly:

"MW MW MW 555 Cassiopeia",

Which was rather amazingly specific information. And which has verification from others in the group.

The constellation of Cassiopeia becomes an "W" every 12 hours, and 12 hours later it becomes an "M".

555 relates to an important code that is astronomical and that this Dialogues II group was briefed on (155 555). And researcher, Piet Tummers, had also specifically been given the number "555", in regards to a photograph of a place where a UFO contact took place in the Swiss Alps in 2003, when Piet was attending an Ananda Bosman seminar at the ecumenical "Centre of Unity", Schweibenalp, Axalp, Switzerland.

He was utterly astounded both by the child's statement and writing of "MW" to illustrate what she said. But also to the exact, and very complexly detailed 155,555 astronomical code, which our present time is synched into since 1994, and the UFO Intelligences are an integral part of.

As this 1.8 year old child drew on paper "MW, MW, MW" for Piet, he kept the paper for his evidence, in relation to his own contact story, in 2003, which involves the civilisation associated

to “Alchimar-Emmanuel” of the “Galactic Council”, governing the future from far the past stars of *Krittikas*, the Pleiades, which mark the beginning of the macro-star-game cycle upon the holographic “wheel-pearls”, or “Soma drops,” reflecting the “face of time”. A story of UFO contact that is on Piet Tummers’ web site, and which must become properly data based in our Civilian Dialogues with the Cosmos data bank — since the UFO contact of 2003 took place during the author’s seminar that Piet was attending, in the Swiss alps.

Also the area telephone code of Silbertal starts with 555, no less!!!

This child has associated UFO sightings at both conception AND 1st contractions starting birth. There are a whole range of NU Kids on this reality block we call Earth. And it is natural for them to interact in this Cosmic Dialogue unfoldment, as well, naturally. After-all, it is their legacy that we are unfolding into.

ALL of the UFO sightings of this event occurred by the Constellation of Cassiopeia. And at the beginning of the 1st session on the Silvretta, chemist Hans Peter Diehl asked Ananda “what is the true meaning of Cassiopeia?” To which the author answered “*Kasyapa*.”

The *Kasyapa/AntarMarda* (Cassiopeia/Andromeda), region in the body of the Veda’s relates to the Vedic story of the “Star Ship of Noah”, or the “Manu” that carried and seeded all life within the many world systems anchored to the Andromeda/Cassiopeia region.

A ship whose proportions are given in divine units of measure, the units of the gods, which portray “MaNuah’s” ship to be many times bigger than Earth. Even the spiral of the Andromeda Galaxy is associated to the “Turtle of *Kasyapa*,” on which *Kasyapa* is anchored (more details are given in our Great Time Gate 2012-2,222 AD series, spanning more than 50 hours of material — including more on the *Antarmrda/Kasyapa* stargates and life-seeding stations of the *Manu*).

Kasyapa is also one of the 8 *Adityas*, within the 8+8+8=24 “Galactic Council,” the “7 suns of the One Sun,” and the “Solar Lords” as Manu-Emmanuel called them in the 1988 contact communication, “The Universal Call”, which also describes “Operation Lift Man”, of which this Dialogues with the Cosmos civilian operation is a part.

So this “MW MW MW 555 Cassiopeia” contribution by an 1.8 year old child (who said this shortly after tis author awoke following the nights sightings, as the 2nd person Ananda spoke to) has Clairvoyant data “signal line” input significance, indeed, with all of the above considered. The place number, the star constellation of sightings, and the “Galactic Council” galactic Holographic Hyper-Net, whose astronomical nature holds the 155 and 555 code.

We suggest all other Dialogue with the Cosmos groups and other Starwatching groups that read this, to pay attention and also record such synchronised data, coming from “unusual places” (which *may* come from the “NU kids”, or through other synchronicities).

As we have described, in the briefings and in seminars for many numerous years — the “intelligent spheres” released by the UFOs, from our experience, appear to be akin to “reality rollers”, that topologically increase the “synchronicity strings” of an area of space and time.

Increased “Highly Meaningful Synchronicity” appears to be part of a higher Operating System (OS) than the semantics of our present neuro-genetic and somatic OS — attempting to interface with our OS through “Increased Meaningful Synchronicity”.

Pay attention to synchronicity in these Dialogues, and catalogue them. Something important may emerge, as our Civilian data bases are compared, shared, and integrated.

CLOSE APPROACHES

During this 2nd Dialogue there were no very close approaches that I am aware of. The close approaches in Dialogues I, at times were able to sneak through. The one I witnessed with Erika Marzani, was at human head height, and went exactly over the pathway we had just walked that lead directly to the site.

Coming from the sky, it made a 27 degree angle turn, from my perspective, to adjust it from crashing into the ground. As the course it was taking would have immediately crash landed the UFO into the ground.

It was at just over human body head height when it made its dramatic degree turn, dramatic due to the enormous speed it was coming in on, and then continued horizontally along the road we had just walked going to the site nearby the Eagle of the Simplon Pass.

Also, what this author terms “Athena’s ship” in Dialogues I, that came to below the mountain line range, was not apparent in this Dialogue II, which would be an intermediary near approach. It appears that these two Dialogue Alpine Twins, also herald a circuitry in the nature of their unfoldment.

In Dialogues I, Switzerland, the civilian group was met more than “midway” by the Other — thus the power that opened the midway door came from them.

In Dialogues II, like a battery or integrated circuit, it was the combined efforts of the civilian group, earth side, (concurrently: long term, like those of Helmut Zudrell; intermediate, like this author’s in the region over some years; and short term, such as the intense efforts made by some members of our group. We felt their presence, and a little in “their” world. This time the momentum of the opening of the Midway door came from Earth Man.

Together these Twain make a perfect balance in a Dialogues with the Cosmos circuit.

Nor the close approach of the large sphere seen by Lt. Korinna A. Muller and Maria Luisa Cossu, crossing horizontally over the Monte Leone glacier, was without equivalent in Dialogues II (other phenomena remain to be explained, also on the Monte Leone glacier on the 2nd night of Dialogue I, as well).

However, within Dialogues II, the close approaches occurred within the “subtle planes”, especially those of the female participant mentioned on page 17, whose estimated time is close to the beginning of the sightings up on the mountains, and perfectly describes in archetypal language, our experience, work, in combination with the sightings.

This 1.8 year old child’s proclamation of “MW MW MW 555 Cassiopeia,” is an other close approach of the direct data of the significant kind (impossible to fake).

The presence of the Other was also felt to be extremely near in Dialogue II’s second night overlooking the Silver Valley.

GOING INTO DEEPER TERRITORIES — EXTENDING BEYOND THE DIALOGUES SYMBOL INFO INPUT

Dialogues with the Cosmos records all signal line information that may came amidst UFO activity and protocols. This includes “Symbol Intelligence”.

Directly from the notes in Dialogues II, info tech input comes a little under 5 hours following the last sighting:

“This morning, 24th August, at 9Am, Austrian long time shaman researcher, Madlon Jaeger, working with Ananda over many years, including the 1996 “time gate”, saw, with eyes closed, a symbol of a Circle, and a Round Spot inside. The spot was colourless and the circle was golden yellow.

“Around the circle there was a pattern of dark violet drops around in a perfect arrangement. And saw it several times, 3 times. ‘And that was it!’

“And then she saw a web or net around like a flash, in the same periphery as the circle. This net was a whitish fog.”

This symbol is in “Athena’s” old cycle (1990s), symbol base imparted then. However, we are now in the “NU Awakening Dream cycle,” according to the understanding this author has been imparted, with another underlying hyper-symbol holographic base operating, as the Ideogram Syntax of the NU: New Universe.

Of course, this is also the symbol for the “Circle of the Sun and the “Third Eye”, in many cultures. In Egypt and *Rg Vedic* times it was called *AK*, in both respectively, and is the only true archaic hieroglyph on the Great Pyramid of Egypt. As well as being the Eye band upon the foreheads of the Indus Valley Priest-Kings.

The *Rg Vedic* ultraterrestrial immortal sage, *Kasyapa*, is also ascribed to being our own sun, or as being the “8th Sun,” of the 7+1 “suns of the Sun”, *Adityas*.

The 7+1 *Adityas* are clearly defined in the *Rg Veda*, and *Taittiriya Aranyaka* 1.7 lists the 7 suns as “Aroga, Bhraja, Patara, Patanga, Swarna, Jyotisiman and Vibhasa”:

"Kasyapa is the 8th. The 7 suns were seen by Pancakarana Vatsyayana and Saptakarana Plakshi. They had only heard of Kasyapa. They were not able to go to Maha-Meru. Gargya Pranatrata was able to go to Maha-Meru and could see Kasyapa."

— *Taittiriya Aranyaka* 1.7

Hereby, the Cassiopeia-Sun connection has a trace in Vedic stellar and interstellar lore, linked directly to the “transient universal One Sun” and to the *AUMkara* as the “Maha-Meru” of the universe.

The violet drops are often associated with the “drops of Soma” in the *Rg Veda*, and the pure colour of purple was also associated to the *Yava Soma* (more in section “*YAVA & The Soma-Net*”).

The “Soma drops” within the hymns of the *Rg Veda*, especially the 9th book dedicated largely to the subject matter of *Soma*, are considered the root of the concept of the “Indra-Net.”

Indra is the chief *Rg Vedic* god of the *Vajra*/Thunder force, or hadronic 5th unified field force, produced by the lightening simulator the *PlasmArc Flow* reactor of hadronic physics, having some 250 hymns entirely dedicated to *Indra*.

This “Indra-Net” is a web, or net, comprised of the purest “Soma Drops” in the *Rg Veda* root description of this concept, and as “pearls” in post-Vedic Hindu texts — where each drop/pearl reflects every other drop/pearl, completely. As worlds reflecting the sum of all other worlds. The *Rg Veda* literally describes our planet as round (two-world halves), describes voyages around it’s sphere, and describes many worlds linked together by the “Soma-Net”.

The “Indra-Net” and “Soma-Net” are the earliest form of the holographic concept of creation, that is now an empirical fact in hadronic physics’ newly discovered *geno* plane, proven to be operating through the biological sciences, within biological systems (Dr. Illert, modelling from a data base of 100,000 conch shell morphologies, empirically established this as an objective fact).

The *geno* plane IS the holographic plane. As it operates in biology, so biological systems, ARE holographic (see the writings of Dr. Animalu, Dr. Chris Illert, Dr. Stein Johansen, and Dr. R. Santilli, within the hadronic physics literature for details).

The *Rg Veda* describes *Indra*, on both a universal and on a galactic scale with the *Marutas* (part of the “Galactic Council” of 8-8-8 = 24), to be establishing the “Soma-Net” to extend from the *AUMkara*’s 7 galactic mountain enclosures (that are 7x7=49 in the Milky Way for 360° [the 49 galactic regions have been astronomically established in this authors 1994 chapter of *The Unity Keys Of Emmanuel: The Interuniversal Perspective For The Unity Of Diversity*, published in 1999), to overflow their blocked “7 Rivers of Soma” to the many worlds systems, and usher in the Awakening Dream from Amnesia within those worlds that have fallen asleep to the Ignorance, maintained by the “universal dream” dragon that *Indra* slew on universal and galactic scales. Within this proto-Vedic cosmology, this “ignorance dragon” of the dream, subsequently each individual person upon the world systems must personally slay (shamanically/yogically), as the *Kundalini* (DNA serpent/dragon force). And rise up to their primordial “Original Model” Unity Self. And joining with the world systems that have awakened in the “Indra-Net”, or universal holographic “Soma-Net” overflowing the *AUMkara*, or universal heart-mind “God-Computer,” to freshly awaken those worlds in slumber.

The 3x of course has deep significance for those who can read between the lines :-)

Colourless point is an interesting description by Madlon, as the Dialogues I, second close approach UFO, was a sphere of a “colourless colour,” as Erika Marzani described it, surrounded by other phenomenon and qualities.

Madlon Jaeger has given her own UFO and UFO related testimonials, one related to phenomenon occurring to this author disappearing from one frame of a sequence of photographic frames, completely, amidst “time-gate 1996”, at around the time that also 3 ETI/IUTI’s materialised at that event to now Norway’s most famous and celebrated psychic/sensitive, whose weekly television show is the most popular in the country, due to her accuracy in the double blind setting she is assigned for the television series. These two events will also be catalogued in this Dialogues with the Cosmos civilian data bank.

SIRIUS DUSK — END OF THE DOG DAYS BRIEFINGS, 23RD AUGUST

Whilst Dialogues I, had little time or space to properly present the hundreds of Keynote animated slides on the detailed levels of protocols on the subject, Dialogues II, which was 3 and half days, did manage to show, around 65% of this Briefing Material on the protocols. This makes these Twin Alpine Dialogues with the Cosmos a complete twain set.

Most of these multimedia animated presentations of the details of the precise protocols have now been decided to be made into a “Dialogue with the Cosmos Briefing Film”, in English, and then translated and dubbed into other European and world languages, to enable the amplitude of the Dialogue with the Cosmos civilian effort to extrapolate exponentially, on behalf of our species.

FOCUS: FUTURE DIALOGUES SPECIFIC EXPERTISE SKILLS

Since these 1st two Dialogues with the Cosmos merely scratched at the surface of the complete toolbox of techniques and protocols we will utilise to interface with the Other — future Dialogues with the Cosmos, by this author, will focus on one theme, at a time, most often, until all Fields of Practice and Techniques of Interface, have been transmitted, clearly, and practised.

Highly specific and detailed fields like ETI-RV: Extraterrestrial Intelligence Remote Viewing, whose extensive techniques and protocols are at least 100 animated slides, with many techniques to pass on AND practice in the Field Work, and in other manners.

As with each Dialogue, there will be several nights of Field Work, engaging Cosmic Dialogues with the UFO Intelligences, and generating further experience, as well as contributing to the European civilian body of documentary evidence, by any Dialogue UFO sightings, and cosmic intelligence interactions, and novel data they may impart.

The original *Dialogues with the Cosmos* (draft 4) description, lists many fields of expertise, such as ETI-VR: ExtraTemporal Intelligence Virtual Reality.

Each of these will become the main focus of the following Dialogues, in order to impart and pass on their precise practice and methodology, properly, from our over 28 years of direct experience and interaction with the Other.

Techniques and protocols that will become valuable Information Technologies for both Intermediary, and Direct Interfacing with the Intelligences behind the UFOs we are working with. Perhaps, appearing new now, but that in some form are likely to become the common syntax of the world ahead, as more direct interfacing with the Other commences.

It is civilian interfacing “they” want, with the peoples of Earth themselves, on behalf of themselves, instead of elite military-industrial-corporate self elected special interest groups (who may at times hit the golden harp strings of a contact, without the privilege intended to be extended to true civilian interface efforts, on behalf of mankind).

From our experience, some of these interactions go way beyond our notion of what reality really is, into the intense domains of the “naked truth”, that the “Omnejective Perspective” and Nature of the Other instills, and expands ones boundary thresholds *into*.

Here, ends the more documentary majority of this Dialogues II Report.

—Ananda Bosman, August 24-25th, (September 9th, 2013)

GOING INTO FURTHER “FAR-OUT” DOMAINS

THE SILBERTAL DOME OF THE SILVER VALLEY & OTHER DOMES

For those unfamiliar with the ontological terrain that follows, we should give a note of warning, that such speculative domains are not for the faint of heart, and are of another character, to the documentary side of the majority of this report.

Proceed with caution.

The “Dome” phenomenon, in the authors experiences, has usually denominated a kind of synthesis weave of the living grid fields, unified by the Aether 5th force, or the hadronic Unified Field Force. And act as a more meaningful cybernetic “star-gate”.

This Unified Field 5th Force has been empirically discovered, and is objectively evident in the hadronic chemistry macro-molecules’ “magnecules”, as well as in “controlled intermediate nuclear fusions” (rather than hot or cold nuclear fusion)

Whose body temperature and higher hadronic-superconductive iso-coupling of twin electrons in an iso-flat state (without valence bonding), are overlapping into the hyperdense media of the hadronic horizon, in the shape of a lemniscate: ∞ , and are stable demonstrations of the 5th Nuclear Force that Unifies all other fields and the other 4 nuclear forces, hitherto known by public science.

In that sense these Earth-Star DOMES are a Unified Field coherent weaving and braiding of fields, woven by the UFO: Unified Field Objects. The embroidery of this weave, also weaves hyper-strings of the Aether-Net, to other planetary strings.

In terms of the “SION DOME”, which the author experienced when 16, and following physical UFO sightings, including UFOs coming out of the local alpine mountains, was “taken” in ETI-VR: ExtraTerrestrial Virtual Reality mode (which also has the synesthesia, or synergetic fusion, of the 5 somatic senses into an All-One Macro Sense, quality) — into underground alpine tunnel systems, and an subterranean base, like a small city.

Whilst the authors experience is on public record long before, it was only in 2003 that Ananda was introduced to a Swiss cousin several times removed, André Fauchere, who had been given explicit Evolyne council (a Swiss commune), permission to enter into these tunnel systems, and, indeed, enter a “city” exactly where I described it on the public record, for historical purposes. Dr Fauchere, however, had the photographic proof and local history of these tunnels and city. Some participants to my seminar series, “The Manu”, taking place near the Swiss Sion, amidst whom were also UFO “abductees” (one a case of the researcher Budd Hopkins) — just would not believe it, until they actually saw the photographs and the book that had the stamp of that local Swiss Commune. Still thinking that my experiences were mere science fiction. In these photographs one can see what can appear to be the plasma-like material going into other planes and densities of reality (which Madam Faucher also experienced, when within them).

Madam Fauchere, was not only experienced in the historical objectivity of these tunnel systems and city, but also had her own Numinous experiences in these very tunnels and city. She was very familiar with this Dome, we have called the “SION Dome”, and had even written other books, which did not have the stamp of the commune, in the French esoteric subject mater, relating her experiences with the “star-gate-like” and “other-dimensional” portal quality of this Dome (see our two part series “The SION Dome” for details) — she was as mutually pleasantly surprised, when meeting the Author in 2003, and having Ananda’s description of this “dome” in 1986, as was the author astounded that André Faucher had actually published a drawing of the dome on the cover of one of her more esoteric books, in the french language, and had gathered reports of others who had interacted with this precisely this same dome.

Furthermore, in 1986, after I had been taken into this underground city through the UFO's ETI-VR, I was transported via the nature of this Dome, to the moon of Jupiter called Ganymede, and taken inside. Where I was taught "ETI-Ka-Ba-La", or the numeric-alphabetic semantic code, behind syntax, as a kind of formative linguistics behind our world, or in-between the lines of our reality. The "Galactic Council" and "Solar Tribunal" base there, within Ganymede, after having been transported through a port upon this jovian lunar surface, was of a hyperdimensional holographic substance, which was also translanguistic, and trans-sensory — where the subjective and the objective meld into an omnijjective whole.

The particular holographic rooms within this subterranean jovian lunar base, therefore, hold the entirety of one's psyche and soul in its living topology. And when another being steps into that room, regardless of the atomic density, planet, domain, realm, plane, dimension, galaxy of the universe, or other universe, it may come from, this being's nature is auto-translated *into* the holographic tapestry of the room. Thereby, they are translated into a level that one can understand at the Highest State of one's own level on Earth, summarised. The translanguistic nature, is not just translating instantly the thoughts and senses of the Other being into this holographic substrate, but also its full nature, culture, and realm is represented, and synthesised and synergised with one's own somatic semantics and linguistic and neuro-genetic languages that are omnijjectively co-present within this holographic living cybernetic morphology — where one's very inner nature is also projected and embodied within the qualitative holographic material of the room itself. And likewise, any other being that comes into that room, is co-joined in that hyper-holographic translanguistic living cybernetic material. This goes beyond being intimate. This is *Veritas* at its prime, the "naked truth" does not fully describe what is going on here. In this manner "Instant Knowing", and "Instant Translations" of vast living experience and living wisdom banks are imparted at the infinite speed of thought, to the very core of one's being.

I was taken there numerous times, on different occasions, and I know that what I was shown was only a small portion of what is possible there, and whose full nature would be too overwhelming for the human embodied emanation to handle, should it be revealed.

In this August 1986 experience via the "SION Dome", I came back knowing mathematics in a new way (which had been my weak field before) — instantly transmitted in a living sense. There are times I can step into this living "Sphere of Semantics and Mathematics" and perform mathematical discoveries that my daily human operating neural functions and personality would be incapable of.

This has been vastly useful in the writing and mathematical discoveries of our work: ***The Manu: An Omnidimensional Artefact At The Genesis of History***, multi-volume book series (with more than 5,000 pages already written since 2002).

From the above description of the author's experience, amidst others, I would dare to say that there are tunnel systems of significance within these mountains designating the "Silbertal Dome", and also beneath the Ubber Weise region, which may include a "trans-dimensional" holographic base of sorts there as well.

Although, this dome may be more "new" in the making, than the physically sensed nature of the "SION Dome".

However, in accord to Athena's relating of working for several years with this specific area, where I have experienced and relayed the presence of the motherships to others, during seminars held in Silbertal since 2009 — including to Patrick Zudrell, who was Interfacing with this mothership, in 2009, and went into a deep state of Vortexijah spin, and into a Sphere, typical of the ETI transportation. It would appear that this Silbertal Dome is more trans-dimensional, and having its local, in other places, which utilise this Dome, for highly specific endeavours.

There was overwhelming physical confirmation of the “SION Dome” that came, eventually. I would say that something similar, but different, is going on here. And that like some of the utterly archaic nature of the “SION Dome” tunnel systems, that appear to be artificial, there may be similar archaic tunnels in Silbertal, from the Supercivilisation we have “descended” from.

Furthermore, should clandestine military ventures attempt to access such “transdimensional bases of the ETI”, (as they have been trying to do in the “SION Dome” through the military underground network of the “Grand Dixon Range”), they will experience a warping of time and space, as the “Aether-Net” auto-adjusts according to intent and intention.

However, it is our impression that some form of contact has occurred in the Swiss SION Dome, with some members of the Swiss military, in a diversity of ways.

Madam André Fauchere does relay that some of the workers that have worked in these tunnel systems over the last 80 years, are changed for life. She has been guiding some of their relief therapy groups, as they experienced “other worlds” and other dimensions “down there”, where the veil between the subjective psyche dividing the objective world, becomes increasingly thin — experiences that changed them forever. Often, in their case, unable to operate “normally” in the outside world, and on handicapped benefits from the Swiss state, officially.

Long before I came to know of the objective nature of these tunnel systems, my transportation through them at the age of 16, by the UFOs instilling “ETI-VR”, precisely described their archaic nature, and their deep earth tunnelling into other atomic densities and dimensions of the multi-dimensional hyper-holographic universe.

Some 17 years later, viewing the photographs of André Fauchere, one can clearly see the apparent hadronic plasma-like materials and other densities co-existing in some of these tunnel systems, it would appear, and her experience directly reflects this contention, and of what appears apparent on the photographs. Going deeper into the Earth, leads to the hadronic-Earth’s own unique hadronic horizon, the All-Oneness of planet Earth that is in the heart of all.

DOMES, CHANDRA ARKS, CHANDAS OF MEASURED METRIC SPACE TRANSPORTATION

These ETI-Domes are significant points of operation with the UFOs and appear in diverse areas. They are unlike the smaller *Chandra* Ark portals, however.

Chandra Arks that link and connect as crescents (or half spheres, of various types), two topological space and time places together, to include other planetary worlds linked to Earth on one side of the *Chandra* Ark, the other end completing the Ark of the *Chandra* on Earth; or or the Earth end arcing to the other end being on the Moon, another planet, or another planet’s moon system, for example.

Although a “Dome” may on a macro level contain a symphony of *Chandras* within its living dynamic cacophony, that comprise the Dome’s qualitative interconnectivity continuum with other planetary worlds, within the “Indra-Net”, or “Soma-Net”, as it is called in the *Rg Veda* — whilst also having similar attributes of its own, that operate more like a “hyper highways”, than the single track portals of the *Chandra* Arks.

Chandra’s come from the Sanskrit root *Chanda*, which is translated as “metres”, or “metres of measure”. And as *Chandra* to include the name of our moon, and imparting this Sanskrit name to our modern science’s “Chandra motion wobble” cycles on Earth, distinctly caused by the moon. The *Chanda* metric metres of the *Rg Veda* give highly specific and universal application to the *Chandra* Arks.

"Directions/dimension are metres that go around."

—*Satapatha Brahmana* 8.5.2.3

In fact they are described as precisely being portals of specific ultraterrestrial space intelligences. There are *Chandas* that link to the worlds of *Indra* (chief of the *Marutas*, the prime *Rg Veda* god, who spans all the realms of the universe, with his unified field *Vajra*/Thunder craft); or to *Savitara*, of

the *Adityas*, that are “many suns as One Sun” in universal realms of whole Light, as $7+1 = \text{One Sun}$; or to the “space gods” of the *Visva-Devakasa*; and to the *Angirasas* that guard the Jupiter portal (*Brhaspati*) to the arching bow of Sagittarius (*Brahmanaspati*) through the galactic centre to the “7th Loka” dimensional world plane, where the *Brahma-Loka* (*Brahmanaspati*), is located, for example (all within the *Rg Veda*).

Within this constellation of the 24, *Indra* of the *Marutas*, shares attributes with the *Angirasa Brahmanaspati*, in freeing the “7 Rivers of Life” from their concealment, along with the “7 logos-Speech cows”. Having the universal string of the *Satya Loka*’s “utmost truth”:

“The wellfount with its mouth of stone and stream of ambrosial-honey which Brahmanaspati broke by his audacious strength, that was drunken by Sun's rays, he watered the streams numerous, at once.

“He opened the door of the waters, that have existed and that will form later,

“Brahmanaspati uses the bow with Truth as its string, wherever he wants, he pervades. Strings drawn to his ear he thrusts the successful arrows to see the men.

“All pervading Brahmanaspati shows his greatness even in smaller conquests. The god expands far bigger than other gods, and envelops them from all sides.

“Wealthy *Indra* and *Brahmanaspati*, laws of both of you always hold, even universal waters can not violate your laws.

“He brought the Speech cows out, divided them by great procedure for heaven, and they started moving individually, by his power.”

—*Rg Veda* 2.24

In *Rg Veda* 4.50.4 *Brhaspati* is called “the 1st-born”, and of “having 7 mouths”. These 7 mouths being the 7 dimensions within the “3-Universal World Spheres” of: Earth/Universal Ground, Atmosphere, and Heaven (our Physical-Subtle-Causal bodies).

As *Brhaspati* and *Brahmanaspati* is the chief head that is heading the *Angirasas*, as the $1+7 = 8$, within the “Galactic Council”; so each of the +1 Chiefs of the *Adityas* and *Marutas* permeate these 7 dimensional forms of the “3 Universal Spheres”.

The *Chandra* Ark’s utilise our “Star-Gate Moon”, as the calculating portal of measure window to all of its destinations, by highly specific measurement divisions of sacred measure of the *Chandra* moon cycles, as one with those of the sun.

The *Marutas* are some of the oldest gods of history, appearing in 500,000 year old Himalayan cave art. Likewise, *Indra*, their Pleiadian (“7 cows” and “7 rivers”) Chief, within the Bull of Taurus, can be established to have archaic roots, pre-dating those of Indo-European influences.

Indra, in bull legged form, appears on Amulet 3305 from Harappa, described in Asko Parpola’s work “Deciphering the Indus Script”.

This deity upon such an ancient amulet displaying the god with a raised club (root of the *Vajra*), and having bulls legs, clearly denominates *Indra* as the prime superhero, of the later *Sarasvati* valley culture, and early Harappan’s going into the *Indus Valley Culture*. For *Indra* in the *Rg Veda* is called a “Bull”.

Indra is considered bull in the Vedas, such as in *Rg Veda* 2.12.12, and so in other Vedas such as:

“Bull is the form of *Indra*:”

—*Atharva Veda* 9.4.7-8

This Harappan amulet’s proto-god also is holding a raised club in one hand, so the Vedas repeatedly describe *Indra* as holding a *Vajra* in his hand.

Hereby, *Indra* has been given a greater archaic antiquity. And often associated with the Bull of Taurus with its Pleiades, the *Krittikas* of *Indra* (one of the earliest astronomical rising constellations in the *Rg Veda*, which describes such a period for the Pleiades, more than 8,000 years before

present), as well as the region of Orion, yielding a club — an Orion arm trend, where our solar system is located within the Orion spiral arm of the Milky Way (which also houses the Pleiades), is ascribed to *Indra*, chief of the *Marutas*.

Domes have been seen erected within days by prominent astronomers over the last couple of hundred years within the “Tycho” crater. A region of the Moon we have had intimate contact with during our Interfacings with the UFO Intelligences, in the later 1980s and early 1990s. The quoted source materials for these massive kilometres in size Domes in Tycho, we present in our “Artificial Moon” seminar presentations

From: our experience (the nature of the Tycho base); to research (finding historical documentation in support of this lucid experience, like searching for anomalous activity at Tycho from credible sources); to deep investigation (whole artificial cities in NASA lunar photographs of Tycho are now revealed) — we uncover the novel actuality of the Moon as a “Macro Star-Gate Operator” for the *Chandra* Ark’s.

The 27 Lunar star houses of the *Rg Veda*, are used in perfect measure geometrical quantified units, to calculate the Ark’s hyper-lensing to other locals within the neighbouring regions of our galaxy. For the Moon, the clear evidence from all sides indicates, is not a natural object. But a living hyper-architecture that breathes: expanding and contracting its hyper-crystalline matrix hyper-geometrically.

Its precise effect on life on Earth by its proximity to Earth making it of equal size to the sun when seen from Earth, and having an equatorial circumference aspect ratio distance to Earth, that when applied to the sun, gives the same mean distance of the Sun to Earth, by a manifold of 108 times, just like the moon to Earth (an astounding fact first evident in the *Rg Veda*).

The precise crystal amplifiers on the critical positions of the moon, at geometrical topological significant positions like those of the tetrahedron, at all times closest to Earth, and subtly affecting the Earth’s seasons, flow of mater and tides, and magnetic field types to allow for the bacteria frequencies that make this life broad-castation possible — are remarkably “time-portal” placed on the moon billions of years ago, effecting the nature of our lives, now (in this model).

The lunar amplifying lense, is not just a telescopic lense, but is a “hyper-lense,” which focusses the Arks of the Hyper-Plane operators of hadronic physics, into hyper-availability, thereby, enabling the *Chandras*, to lense to various space and time topologies, through hyper-locomotion of the living hyper geometries of the *Chandra* Arks, and the UFOs.

However, this has largely been experienced in ETI-VR form by this author, although there are reports of others who have passed through similar Arks physically, as portals to extraterrestrial places. To what degree the ETI-VR and the physical sensorial/somatic holographic apparatus converge, amidst the the presence of the Other, is an area of further exploration.

The *Chandra* Ark’s links to other planetary planes are precisely calculated by exact measures of the lunar cycle proportion units, to the relevant area the *Chandra* is being linked to, or through one of the “7 prime *Chandas*”, that links to the classical places of the *Marutas* and *Indra*, by the Pleiades, galactic centre, Orion, and Mars; or to the places of the *Angirasas* domain abode nodes in the Jupiter system, galactic centre and Sagittarius region, and other Loka’s.

These prime 7 *Chandas*, are irreversible Arks, linked to 16 lesser *Chandas*, of over 90 *Chandas* appearing in the *Rg Veda*, to compose the body of the *Maha Purusah Manuvah*, or Cosmic Anthropos, of *homo omniversalis/cosmicus*.

There are, via a synergy with the Jupiter system Ark *Chandras*, the *Prajapati Chandra* Ark’s to the “Saturn Council” governors of time, the “12 *Prajapati*’s”.

Also, *Rudra-Siva*, father of the *Marutas*, has *Chandra* Ark portals via Saturn to his domains of denomination, which include the Orion and Sirius systems, as well as the Pegasus square that holds one of the stars of the Andromeda constellation.

This authors initial experience of the *Chandra* Ark portal phenomenon in ETI-VR, years before uncovering the same concept in the *Rg Veda's Chandas*, gives increasing validity to the fact that the *Rg Veda's* proto form at the genesis of history, was truly derived from an interdimensional and intergalactic Supercivilisation. Just as the *Rg Veda* itself states.

References:

Regarding "*The SION DOME*". It was released as a Grail Zine in 2003 to the Grailist of Diamond Body practitioners, with the title: "*THE SION DOME: Unity Keys Confirmations For The Sion Star Gate. An Analysis,*" as a 61 page report, available on request from sincere enquiring individuals. It includes detailed analysis of the superconducting rare earth elements found in this star-gate that has effected this author in a major way, some 3 times in his life, actually altering the cause of his life, dramatically. The CERN Lab's analysis of these elements, together with our visionary science speculations congruently part of the report, with important little known references to obscure papers within the scientific literature.

The 2nd part is included in a book in the making called *SIONA*, which has vital information to the ETI-Ka-Ba-La language computer, and meetings with high initiates who have been trained a lifetime in the actual science of tracing this language computer syntax in historical works, and the like.

YAVA & THE SOMA-NET DROPS OF THE INDRA-NET

YAVA and D'YAVA, in the *Rg Veda* is both the "Heavenly Sky Father", and the purple that governs barley, and in the special barley ceremonial beers. YAVA is also a name of barley, and is often used to denote "a seed bearing Pod".

YAVA can clearly be demonstrated in academic manner to be the root source of the Torah's YHVH, or "Holy Name of God".

The essence of the Hellenistic Mysteries's chief sacrament, the *Kikeon*, was also purple in colour, when it was administered, one time in a lifetime, by the hierobotanical hierophants of the Greater Eleusian *Mysterium Tremendum*, descended from the more complete and primordial "3-day Soma Ceremonies" of the *Rg Veda*, which are described to induce "biogenesis and metamorphosis" into a "Body of Light", or Hadronic Aether corpus, an "Aether body" form, from which many of the ETI have often been witnessed to decouple from, into a localised form.

We have directly witnessed several types of this Aether form, manifest into the visible domains (for instance, one in 1986 with Salvana, another in 1995, with Athena and 2 Others with her).

The *Rg Veda* also makes clear that some of the Galactic Council's ultraterrestrial vehicles, also brought 108 genetic botanical species that accessed the galactic "Soma-Net" through their hyper-genomatic activating syntaxis. ETI/UTI botanical species brought to Earth as a genetic technology, linked to the ETI-VR "Soma-Net" holographic systems of the galaxy.

The "Soma drops" within the hymns of the *Rg Veda*, especially the 9th book dedicated largely to the subject mater of *Soma* (the orients root of the Grail Elixir and Alchemical Stone proper), are considered the root of the concept of the "Indra-Net," the primordial root of a dynamic living holographic system.

Described as a net comprised of the purest "Soma Drops" in the *Rg Veda* root description. Each pure "Soma drop" reflects every other drop, like worlds reflecting the sum of all other worlds. From this was born the concept of the *Bindu*, the capstone point that is both Sun and Moon in Indivisible Matrimony; Immaculate Emptiness Indivisibly Co-Present with Infinite Blissful Oneness — within the arcane systems from a variety of later traditions, derived from this.

The *Rg Veda* literally describes our round planet linked together with many other planetary world systems and "island universes," by this "Soma-Net" hyper-holographic network. And that this "Soma-Net" was severed in the past, bringing man into the game of mortal holographic dream universe, sleep.

And which is in process of being re-established by the 3 member types of the "Galactic Council of 24": The *Angirasas*; the *Adityas*; and the *Marutas*. Primarily being re-established by the efforts of

Indra, chief of the *Marutas*, and related to Alchimar-Emmanuel, as an epithet of *Skandra-Indra*, associated with the Pleiades, in primordial form (existing billions of years ago and stirring the future, by time travel, according to the contacts of Enrico Castillo Rincon. Whose biomorphological ability to change their body build, was noted, and who stated that their sun in the Pleiades region, existed billions of years ago, and is no longer seen, as it has long ago past, in our present time era. By using this primordial Pleiadian node in the past, as an axel, they can steer the holographic topology of the future worlds, with more precise physician fine tuning), with a gate to a base on the planet Mars.

The *Rg Veda* describes *Indra*, on a universal scale, and more astronomically accurate on galactic scale, with the *Marutas* to be establishing the galactic “Soma-Net” to be extended from the *AUMkara* “binomial” foundation of the galaxy to overflow the “Soma Essence” to the many worlds systems that were severed into deep universal sleep.

As the *SomAmrta*, or “Primordial Essence” was once again integrated by the intelligences within these many world systems, so too did the Soma awaken their primordial nature, the “Original Model”, of the *Ati-Manu*, or “Ultimate Superself”, and usher in what the Emmanuel’s terms in the 1980s, “the Awakening Dream’.

The Soma Aether Flow essence of the Unified Field, re-establishes amidst the Twilight State it instills in its initial activation, the re-association and identification of the foundation of the self as actually being the *Ati-Manu*, or “Utmost Superself”, the “Original Model” of the *Rg Veda*, as the proto-prime “Superconscious Form” existing as the Indivisible 4th: *AUMN*. And being the actual irreversible nature of our Being.

Whereby, (again, in this model), our primordial Superconsciousness form, within the Supercivilisations we descended from, are re-realised, and in Omni-Realisational re-Union with *Homo Cosmicus/Omniversalis*, the *Manuvah* of the cosmic Anthropos, and is cognitively phase-conjugating to its Original Macro Cosmic Nature.

Dialogues with the Cosmos are a part of this endeavour.

The “Net of Light” has great significance in the Theocratic “star code” mathematically embedded within the 27 Books of the New Testament. Whose 27th book, this author has begun to uncover, is using a similar code to that used to code the *Rg Veda* mathematically, with self-similar auto-referencing and auto-correcting systems, embedded in this mathematical syntax.

This highly specific field which has occupied numerous pioneering individuals, has become a natural talent to this author, since the ETI-VR voyage in 1986, via the “SION Dome”, to the “Ganymede base”, which also transmitted a mathematical-syntax logistics.

Within the synoptic Gospel’s “Q-texts”, the “Net” also relates to the “Sons of Light.” Those who join the cosmic Anthropos of Cosmic “Christos-Sophia” in the Gnostic streams, along with the “Sons of God” (B’Nai Elohim).

ISSA-Kristi-Naam, is one name of the Cosmic Anthropos, or “Godhead”, in the *Rg Veda*. And the *B’Nai Elohim* are derived from the *Rg Vedic Ima-Manu-Ila* (just as *Allah Hu Mana* is the Koran’s equivalent of “Emmanuel”: “God With Us”, derived from this *Rg Veda* root. As are the plural *Elohim*, components and anagrams derived from *Ima-Manu-Ila*, as *Ila-U-Im*.

The Earth grid system, explored and utilised in Dialogues with the Cosmos, as “Operation Star Grid Light”, uses the “PHI Grid” program, that accurately charts the 80 gravity anomalies of the planet, the Dodecahedron tectonic plate morphology. As well as the *Ferum* magnetic Icosahedral grid, in Sierpinski form, fractally to one’s local gridlines — establishes the High Earth Grid systems already woven by the UFO Intelligences, in accord with the tuning of the 12 tone music cone tuned solar system instrument.

Where planetary strings are comprised of web-like fibres, just like a guitar string is coiled, amidst the hyperstring unified field embroidery of the galaxy and universe:

"The Sun and the rest of the universe are woven in string. What is that string that is Vayu."

—*Satapatha Brahmana* 8.7.3.10

A proto description of the scientific "field" strings, terminology. *Vayu* is one of the *Aditya's* and is also known as *Vata*. This subtle field aether quality of *Vayu* is often later cross referenced with *Prana*, and permeates all creation:

"There is no place in the universe that is without *Vayu*."

—*Maitrayani Samhita* 2.2.7

Brahmanaspati uses the bow with Truth as its string, wherever he wants, he pervades. Strings that are drawn to his ear he thrust the successful arrows to see the men."

—*Rg Veda* 2.24:8

The Earth PHI Grid (which corrects the CIA mistake in the UVG Becker Hagens Earth grid, that does not use the Great Pyramid as its "zero meridian", and which the PHI Grid does) — making all the difference in these "Operation Star-Grid-Light" ventures, as most of the world's wondrous archeological sites have navigation readouts to Giza as the ancient version of the "Greenwhitch" zero meridian, of the primordial world grid system. Such as the *Ankhor* complex in Cambodia, comprised of 72 temple complexes being also 72 degrees from the Giza pyramid, and a myriad of examples, some given in the briefings. And PHI Grid is fractal down to all local scale through Sierpinski Icosahedrons and Sierpinski Dodecahedrons.

Tuning of the Earth grid, by man with star-man, enables the re-tuning of the planetary string in accord to the new tuning of the solar system (whose external density has more than dramatically increased its density, being many scales of magnitude denser than it was in the 1960s [as Dr D'mitriev has shown], due to our solar system entering a "new region", or "band", in space) — into the New Tree of Life galactic "Indra-Net" system.

Or tuning of Earth grid, solar system 12 octave string/cone instrument, into the galactic "Soma-Net", that engages the "Awakening Dream" within the holographic dream world systems (here using a combination of Emmanuel/Galactic Council communications paradigms with *Rg Veda* paradigms, research, and musical research, and UFO Field experience).

This "Soma-Net" being evident in the galaxy since 1994, synchronising a 100,000 years of time hyper-holographically, into one hyper-time concurrent hyper-highway (this is central to the 155, 555 code, as the briefings gave in hitherto, never before presented material on this planet, by this author, in the briefings of Dialogues II.

MORE SPIRITUALLY ARCAIC EXPLORATIONS — ONTOLOGICAL & ESCHATOLOGICAL DEEP SPECULATIONS FOR THOSE STRONG OF HEART
4-MULA — FOUR CROSS SECTIONAL STARGATES

You will note that Dialogues I on the Swiss Simplon pass was by the Simplon Eagle, and the Monte Leone glacier. An Eagle and a Lion, of Scorpio and Leo.

Dialogue II's first session was next to the Oxen (Bull) glacier. The Taurus constellation.

Hence, 3 out of 4 of the 4-Mula/Formula stellar animals that hold the cross of the 12 star gates of the Zodiac, are chartered.

3-4 also is DNA base-pair coding language, as 3 out of 4 DNA helical base-pairs hold an amino acid letter.

The 10th book of the *Rg Veda*, holds one hymn (90), which has a 12,000 year old pictographic version amidst the archeological sites of the *Sarasvati* River Valley Culture. This particular hymn describes 3/4 of *Homo Cosmicus/Omniversalis* withdrawing from this universe by 10 golden fingers, which are used to describe dimensions. With 1/4 remaining as all 10,800,000 life forms and 432,000 *Manusah* "humanoid species", as well as all that is not biologically animate "does not blink."

Of the 432,000 *Manusah* humanoid races comprising "universal man", only 1/4 (108,000) are described to be in Supercivilisations operating in the "Original Model" of Superconsciousness;

whilst the remaining 324,000 humanoid species and civilisations are shrouded in cognitive sleep/ignorance.

As the 3/4 Cosmic *Manuvah* that withdrew from the 1/4 in our universe, rejoins universal man, so too does the 1/4, or 108,000 Supercivilisations, re-join the 324,000 civilisation deep in universal holographic sensorial dreaming civilisations. This re-union is portrayed to be the present emergence of the UFO Intelligences, engaging their Dialogues with the Civilians of Earth Man — a new cycle just inaugurating at present.

Of the 4 Zodiacal cardinal signs, the remaining 4th = “the Angel/Aquarius.” In proto-Vedic thought the new 4th Omega/*Satya Manu-Salhvana*, overlapping the 4th Alpha/*Ruta Manu* that started the life genesis cycles of our many worlds.

Salhvana whose name means “Water of Life Bearer”, or “Aquarian”, from the proto-Vedic cosmology of the *Sarasvati* River Valley Culture pictographic seal language portrayal of the *Manu-Salhvana*’s, archaic portrayals of the proto-*Rg Veda* before it was consigned to *Rg Vedic* Sanskrit. It was one of the *Salvana*’s of Emmanuel that materialised to this author into a physical face-to-face encounter, in November of 1986. An utterly life-changing experience (on the public record before it was published in the 1992 book, “The Light of Emmanuel”).

Salvana, whose presence became one of the prime Ultraterrestrial (Hyper-Terrestrial in our understanding) teachers of significance in our life.

And in the form of, *Salvador-Salhvana*, under the Emmanuel Ultraterrestrial Umbrella, is described in the 1980s communication contacts, to be a conductor of the UFO fleet manifestations around the world (just as fleets of UFOs overflowed the US White House during most of July 1952, caught on camera, and stirring the US nation. Fleets of UFOs have been reported by astronomers crossing the sun and the moon, or leaving Venus and Mars for several hundred years, as documented in our 1992 book, *The “Alien” Presence*).

The manifestation of *Salvana*, and communications from *Salvana-Emmanuel* and *Salvador-Salhvana* of the *Salvana*’s, occurred 16 years before this author came to learn of the most archaic historical root of *Salvana*, as one of the *Manu*’s, and as a group of *Salhvana* “water bearers” within the *Sarasvati* Valley culture pictographic script language. And ascribed as a numinous (“ultraterrestrial”) author of at least 3 hymns of the *Rg Veda* — to the utter astonishment of this author, when 32 years of age, in 2002.

The proto-Vedic concept of the *Manu* “Superself” governors, given in the “astronomical code” of the *Rg Veda*, has this Aquarian *Manu-Salhvana*, overlapping into our present era and going into the year 2,222 AD, when our sun and ecliptic again conjuncts the galactic centre (*Visnu Nabhi*) — marginally closer than the conjunction of our era, much closer to the true Zodiacal Age of Aquarius.

Or from another vantage, the missing 4th Sign, the “Angel”, the Silent $\wedge N$ space “Operator” of the Indivisible 4th of AUMN: the *AUMkara* described by the 5th *Veda* to be used as a “universal intelligent computer system”, by the myriad of *Manusah* humanoid races stemming from the *Manu* and Cosmic Man, the *Manuvah*.

Superconscious Civilisations that operate in the “Original Model” described in the *Rg Veda*, that are in the continuum of Being the Indivisible 4th, or AUMN Superconsciousness (*Ati-Manu* in the *Rg Veda*, and root of *Atman* “Superself”).

Where, all of the 4 bandwidths of consciousness: Alpha-8Hz—Theta-4Hz—Beta-16/32Hz—Delta-2Hz, are Superconsciously Indivisibly co-present, and utilised concurrently in their entirety, by these Cognoscenti Super-Civilisations.

Or from another angle, the missing 4th, the Angel = “Star Man” in the form of the *Angirasas* (root of Angelos/Angels) that form a part of the “Galactic Council of $8+8+8 = 24$ ”.

Star-man as Angelic Man meeting Earth man standing in the midst of the Zodiac star gate wheel’s 3 stellar animals. The 4th sign unhinging as a Lynch Pin the 3 animal nature bands operating in human cognitive ignorance.

Angel of Aquarius in reference to the Aeon of Aquarius, emerging in some time to come, where Earth Man as *homo-terrestris* co-joins with *homo-universalis*, that are being re-united with *homo cosmicus/omniversalis*: the “Omniversal Man” of the Cosmic Anthropos, whose omni-holographic corpus reflexes the omni-myriad of universes of the cosmos comprising the topology of Its Omni-Infinite/Eternal Body of the Omniverse (in both *Rg Vedic* and Emmanuel cosmology).

Three coded names, within the geo-cartographical placements of these Twin Alpine Dialogues with the Cosmos, as part of 4 Meaningful Synchronised geo-etymological clues (controlled, or otherwise)!

It was the Lion and the Eagle that had their closest approaches. Whilst the Oxen/Bull had virtually non, besides the initial 7-8 pulse-flashes, high up in the west, amidst the clouds, at its inauguration. Is this part of a star code?

The glaciers, we have demonstrated in our 2003 “SION DOME” paper, to contain adequate rare earth elements from the period table, that can act as superconducting “star-gates” or “dimensional” and “inter-universal” components of hyperdimensional doorways.

Also the mountains of the Simplon Pass of Dialogues I, link to the “SION Dome” mountains directly, and the Simplon Pass directly overlooks the *Valais* valley, whose capital is Sion! In Vedic semantics *SIONA* is a form of *Sunya*, the “Invisible Sun” of “Immaculate Emptiness.”

With these deep ontological and eschatological speculations, not for the faint of heart, we close this 2nd report.

Arcane explorations apparently quite diverse from the documentary evidence data basing of the civilian Dialogues with the Cosmos — yet, perhaps, amidst some of the early musings, rousing from sleep, in beginning to grapple with the Syntax of Supercivilisations whose OS, best can interface with our holographic and sensorial world’s OS, like the OS of a 2013 attempting to interface and describe itself to the OS of a 1984 computer language. Repeating certain symbols in the old OS, will comprise a graphic that portrays the icon of a graphic interface advanced OS. Awakening Man amidst an Awakening Dream (like the 2010 Purdue and Stanford University’s announcements that all of the laws of nature are being re-written from an Intelligence “Speaking” from our sun, and altering our radioactive decays rates, and the laws of the elements that comprise our stable holographic universal reality, including the announcement of observed “time-dilation”! Time is expanding space) — and in Dialoguing with their Cosmic cousins, beginning to stir from the Amnesia, and remember the universal language of the “Original Model” (OM).

Dialogues with the Cosmos, continues, and its civilian data base is growing, together with other similar civilian efforts over the world. Along with the extraordinary efforts as history in the making, by the Brazilian government’s disclosure of all secret UFO files through all its military departments — along with PRG’s Citizens Hearing on Disclosure, shaking the House and the Congress, by every single senator, representative, and congressmen being briefing on the UFO evidence of this 5 day briefing in congressional hearing format, at this very time.

Parabolic to the sound of thunder striking Earth 1000 times a minute amidst a gradual Earth magnetic pole shift, and like the birth pang-like Earthquakes upon the foundation of the democratic supnation’s flour.

Awakening Man stirring from its Amnesia and engaging midway dialogues with “universal man”, or the Other as the UFO Intelligences, clearly engaging Earth for over 72 years, and now more overly than ever before, to any sincere and awakening human individual, or group.

It is in this civilisation’s individual civilian’s providence, together, to unveil the final curtain of the stage of the neuro-cognitive holographic dream world, and engage our Primordial Roots as they are engaging us, midway.

This inevitable future providence, rests in Y-Our heart-minded hands, by the civilians of Earth, for the civilians of the planet, of the civilians of our world.

Dialogues with the Cosmos has begun. Par Excellence.

~Ananda Bosman, 9-9-2013
